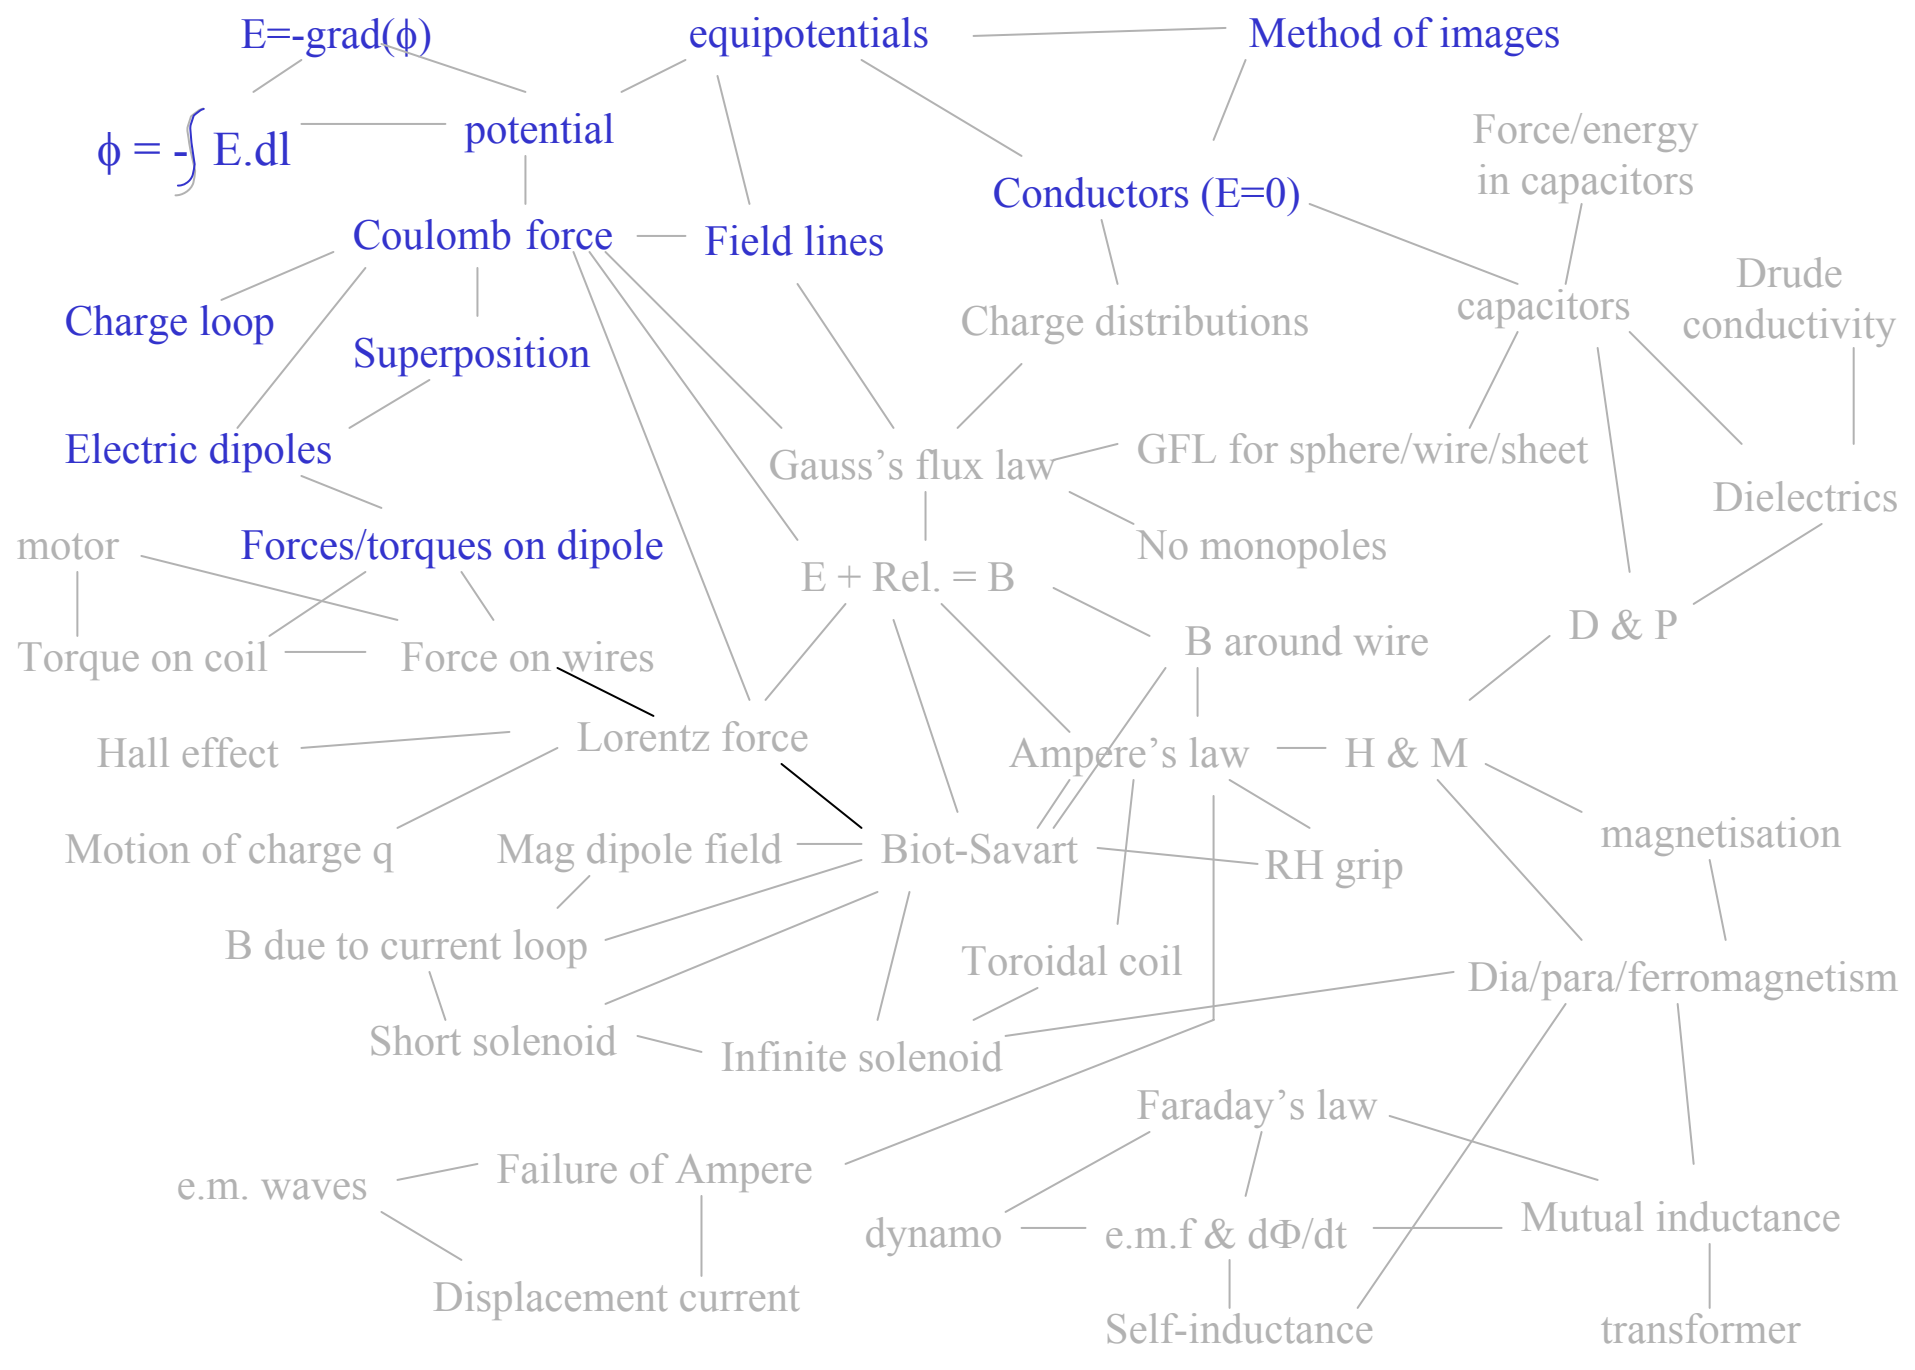
E=-grad(ϕ)
equipotentials
Method of images
$\varphi = -\int \mathbf{E}.d\mathbf{l}$
potential
Force/energy in capacitors
Conductors (E=0)
Coulomb force
Field lines
Charge loop
Superposition
Charge distributions
capacitors
Drude conductivity
Electric dipoles
Gauss's flux law
GFL for sphere/wire/sheet
Dielectrics
motor
Forces/torques on dipole
No monopoles
E + Rel. = B
D & P
Torque on coil
Force on wires
B around wire
Hall effect
Lorentz force
Ampere's law
H & M
Motion of charge q
Mag dipole field
Biot-Savart
RH grip
magnetisation
B due to current loop
Toroidal coil
Dia/para/ferromagnetism
Short solenoid
Infinite solenoid
Faraday's law
e.m. waves
Failure of Ampere
dynamo
e.m.f & dΦ/dt
Mutual inductance
Displacement current
Self-inductance
transformer



E=-grad(ϕ)
equipotentials
Method of images
ϕ = -∫ E.dl
potential
Force/energy in capacitors
Conductors (E=0)
Coulomb force
