

G054 **ADVANCED GCE**

APPLIED INFORMATION AND COMMUNICATION TECHNOLOGY

Unit 15: Software Development

THURSDAY 17 JANUARY 2008

Morning

Candidates answer on the question paper.

Time: 1 hour 30 minutes

Additional materials (enclosed): Candidates Instructions G054/IC (Inserted)

Additional materials (required):

Pre-release materials and tasks with Candidate Instructions

Candidates pre-prepared materials

Candidate Forename				Candidate Surname			
Centre Number				Candidate Number			

INSTRUCTIONS TO CANDIDATES

- Write your name in capital letters, your Centre Number and Candidate Number in the boxes above.
- Use blue or black ink. Pencil may be used for graphs and diagrams only.
- Read each question carefully and make sure that you know what you have to do before starting your answer.
- Answer all the questions.
- Do **not** write in the bar codes.
- Do **not** write outside the box bordering each page.
- Write your answer to each question in the space provided.
- Attach your pre-prepared material for tasks 1-4.

INFORMATION FOR CANDIDATES

- The number of marks for each question is given in brackets [] at the end of each question or part question.
- The total number of marks for this paper is 100.
- No marks will be awarded for using brand names of software packages or hardware.
- The quality of your written communication will be assessed through Q7.

PLEASE DO NOT WRITE ON THIS PAGE

One of the purposes of the proposed system is to increase the security of information held on the

Section A

1

This section relates to the case study on Island Fly.

	com	nputers in the head office.
	Des	scribe two other purposes of the proposed system.
	Pur	pose 1
	Pur	pose 2
		[4]
2	Fun	actional and non-functional requirements are defined during the feasibility study.
	(a)	One functional requirement of the proposed system is to keep a database of members of the Frequent Flyer scheme.
		Describe one other functional requirement of the proposed system that relates to the Frequent Flyer scheme.
		[2]
	(b)	Describe the defined non-functional requirement that relates to hardware.
		[2]

3	Dur	ing the development of the leasibility study the client may define process constraints.
	(a)	Describe the software constraint that has been defined by Island Fly.
		[2]
	(b)	Describe the budget constraint that has been defined by Island Fly.
		[2]
4		scribe two problems, caused by the current system at Island Fly, that are having a direct impact staff who work in the hangar.
	Pro	blem 1
		blem 2
		[4]

5	One of the defined user requirements is that there should be increased security.
	Identify and explain two security methods that could be implemented at Island Fly.
	Method 1
	Method 2
	[6]
6	Investigations must be completed during the feasibility stage.
	Describe one advantage and one disadvantage of using observation as an investigation method in the head office of Island Fly.
	Advantage
	Disadvantage
	[4]

One of the outcomes of the feasibility study is recommendations for the development of the

Explain the advantages and disadvantages to Island Fly of recommending a customised off- shelf software package rather than a bespoke software package.		
The quality of your written communication will be assessed through this question.		
[10		

7

proposed system.

8	Island Fly have decided to implement a customised off-the-shelf system. The staff at Island Fly will need to be trained to use the new system.						
	Identify and explain a training strategy that could be used for the administrative staff.						
	[6]						
	[0]						
9	The owner of Island Fly is concerned that the proposed system will be able to cope with any changes in legislation.						
	Identify and explain the type of maintenance that would be required.						
	[3]

10 Data and information about the Frequent Flyer scheme need to be stored.

(a)	Identify the most appropriate type of software for storing these records, justifying your choice.
	Software
	Justification
	[3]
(b)	Identify the most suitable device for backing up these records, justifying your choice.
	Device
	Justification

Section B

You do not need the case study or your notes to answer these questions.

11 A physical design specification is developed during the design of a new system.

(a)	Identify two components of the hardware specification part of the physical design specification.
	Component 1
	Component 2
	[2]
(b)	Identify two components of the input specification part of the physical design specification.
	Component 1
	Component 2
	[2]
(c)	Explain why detailed program specifications should be passed to the end-user of a system.

© OCR 2008 [Turn over

12 It may be necessary to perform maintenance during the life of a system.

Explain	the following types of maintenance giving an example of when each could be used:
(i)	perfective
	example of use
	·
(ii)	
(11)	
	example of use
