2. Study the diagram below.

Unemployment and changes in the retail price index (inflation) for selected years between 1976 and 1994 including line of best fit.

The figures alongside the points in the diagram represent years – so '80 means 1980 and '94 means 1994, etc.

(Source: adapted from *Economic Trends Annual Supplement* © Office for National Statistics, reported in Alain Anderton, *Economics*, Causeway Press, 2000)

- (a) Use the data in the diagram to produce a table showing the relationship between inflation (%) and unemployment (%) for the years 1979, 1980, 1993 and 1994. Ensure that your table has a title and is neatly presented.

(4)

- (b) Look at the line of best fit and estimate (to the nearest whole %):

- (i) the level of inflation when unemployment is 5%;

(1)

- (ii) the level of unemployment when inflation is 8%.

(1)

(c) How useful is the line of best fit in making predictions about the relationship between unemployment and inflation?

SECTION C

There are three questions in this section. You should answer ONE of them. Put a cross in the box indicating the question you have chosen (☒). If you change your mind, put a line through the box (☒) and then put a cross in the other box (☒).

You are reminded that an appropriate conclusion to your argument is required. In answering the question you should consider arguments for and against the statement.

- 10.** ‘Protest is never justified if it results in hurting people or damaging property.’

Assess the arguments **for** and **against** this view.

(17)

- 11.** ‘There is no need for the state to intervene in the way parents bring up their children.’

To what extent do you agree with this statement?

(17)

- 12.** ‘A person found guilty of a criminal offence on three occasions should be required to serve at least five years in prison.’

Assess the arguments **for** and **against** this assertion.

(17)

There will be additional marks for quality of written communication.
