READ INSTRUCTIONS OVERLEAF

INSTRUCTIONS TO CANDIDATES

- Write your name, centre number and candidate number in the boxes on the first page. Please write clearly and in capital letters.
- Use black ink. HB pencil may be used for graphs and diagrams only.
- Read each question carefully. Make sure you know what you have to do before starting your answer.
- Answer **ALL** the questions in Section A and **ONE** question in Section B.
- Write your answer to each question in the space provided. If additional space is required, you should use the lined pages on pages 18–20 of this booklet. The question number(s) must be clearly shown.

INFORMATION FOR CANDIDATES

- The number of marks is given in brackets [] at the end of each question or part question.
- The total number of marks for this paper is **60**.
- You are advised to divide your time equally between Sections A and B.
- **THE QUALITY OF YOUR WRITTEN COMMUNICATION WILL BE ASSESSED, INCLUDING CLARITY OF EXPRESSION, STRUCTURE OF ARGUMENTS, PRESENTATION OF IDEAS, GRAMMAR, PUNCTUATION AND SPELLING.**
- This document consists of **20** pages. Any blank pages are indicated.

BLANK PAGE

SECTION A

Answer ALL the questions in this section.

- 1 (a) Students in a college are carrying out an investigation into the effect of exercise on skin temperature. There are 880 people in the college and an alphabetical list is available to help the students choose a sample for the investigation.**

Explain TWO ways in which the students could select a sample from the college population.

[6]

(b) Some students have recorded their results in Fahrenheit ($^{\circ}\text{F}$) and need to convert these to Centigrade ($^{\circ}\text{C}$).

(i) One student uses estimation, as follows:

subtract 30 from the temperature in $^{\circ}\text{F}$

halve the answer to give the temperature in $^{\circ}\text{C}$.

Use this method to convert 98°F to $^{\circ}\text{C}$.

[2]

(ii) Another student uses the formula

$$^{\circ}\text{C} = 5/9 (^{\circ}\text{F} - 32)$$

Use the formula to convert 98 °F to °C, giving your answer to 1 decimal place.

[3]

[6]

2 (a) The following equations are formed by addition.

$$1 + 2 = 3$$

$$4 + 5 + 6 = 7 + 8 = 15$$

$$9 + 10 + 11 + 12 = 13 + 14 + 15 = 42$$

$$16 + 17 + 18 + 19 + 20 = 21 + 22 + 23 + 24 = 90$$

Identify and explain TWO patterns in the numbers.

[4]

BLANK PAGE

Question 2b begins on page 10

(b)

A bee moves from starting point X into its hive. It can **ONLY** enter the hive at either cell 1 or cell 2. Once inside the hive, the bee can move **ONLY** to an adjacent cell with a higher number. So, for example, the bee has only one possible route to cell 1, but to get to cell 2 it has two possible routes – it can either go directly to cell 2, or it can go to cell 1 and then into cell 2.

- (i) Work out how many possible routes the bee has to **EACH** of the cells 3, 4 and 5.

[4]

- (ii) Predict the number of possible routes the bee has to cell 6 and explain how you made your prediction.

[5]

SECTION B

**Answer ONE question from this section.
Your answer should be in continuous prose.**

- 3 The UK has a target of increasing its use of renewable energy sources to 15% of its total energy consumption by 2020. Renewable energy sources include for example, water, solar, wind, biomass and geothermal.**

Describe FOUR disadvantages of using renewable energy sources, giving examples from your own knowledge and experience. [30]

- 4 Scientists have contributed solutions to many medical problems. Current problem areas include:**

ageing population

obesity

drug and alcohol problems

mental health problems.

Funds for medical research are limited.

Select TWO of these problem areas. Argue the case for giving ONE of them priority over the other for funding. [30]

- 5 Scientists involved in space exploration are experimenting with the possibility of growing food in space.**

Describe how, in the future, this research may have benefits on earth and in space. [30]

Begin your answer on page 14

Write the number of the question answered in the margin.

[illegible]

ADDITIONAL ANSWER SPACE

If additional answer space is required, you should use the following lined page(s). The question number(s) must be clearly shown in the margins.

Copyright Information

OCR is committed to seeking permission to reproduce all third-party content that it uses in its assessment materials. OCR has attempted to identify and contact all copyright holders whose work is used in this paper. To avoid the issue of disclosure of answer-related information to candidates, all copyright acknowledgements are reproduced in the OCR Copyright Acknowledgements Booklet. This is produced for each series of examinations and is freely available to download from our public website (www.ocr.org.uk) after the live examination series.

If OCR has unwittingly failed to correctly acknowledge or clear any third-party content in this assessment material, OCR will be happy to correct its mistake at the earliest possible opportunity.
