Answer ALL questions. Write your answers in the spaces provided.

Case Study Scenario: Ill Health

Daniel was a baby when he was diagnosed with cystic fibrosis, which is a life-limiting genetic condition. His family were told that the main health concerns with this condition are lung and digestive system problems.

Daniel is now eight years old and his family support him to manage his condition. When the diagnosis was confirmed, Daniel began a support programme. Daniel's attendance at school has dropped as a result of his condition. He is now continuing with his support plan. However, Daniel's family are worried about how Daniel will manage his condition in school and also how he will manage it when he is an adult.

Case Study Scenario: Physical/Sensory Disabilities

Emily is 44 years old and has multiple sclerosis (MS). Emily has impaired vision and reduced mobility because of her MS. She can live independently in her own home with informal support from her family and friends. However, Emily's GP has asked for extra support and a twice-daily visit from a domiciliary care service has been arranged.

Claire is the main care assistant who helps Emily with her personal care needs. However, Emily dislikes the fact that Claire spends too much time talking and does not give her enough help around the house. Emily has asked for the domiciliary care to stop.

There have been other complaints about the care assistants and there is now going to be an inspection of the domiciliary care services.
