Wednesday 5 June 2019

Morning (Time: 1 hour 30 minutes)

Paper Reference **31493H**

Health and Social Care

Unit 3: Anatomy and Physiology for Health and Social Care

Calculator (optional).

Total Marks

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and learner registration number.
- Answer **all** questions.
- Answer the questions in the spaces provided – *there may be more space than you need.*

Information

- The total mark for this paper is 90.
- The marks for **each** question are shown in brackets – *use this as a guide as to how much time to spend on each question.*
- You may use a calculator.

Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.

(Total for Question 5 = 18 marks)

6 The data for Question 6 results from a three-year epidemiological research project – ‘The respiratory health of the nation’ – funded by the British Lung Foundation.

The research project team used The Health Improvement Network (THIN) database records for 2004-13 to estimate prevalence and incidence data. These 12.6 million patient records from 591 GP surgeries represent a sample of approximately 5% of the population. The team then scaled up the results to estimate prevalence in the whole population.

The research project team obtained mortality data from the Office for National Statistics for England and Wales, the General Register Office for Scotland and the Northern Ireland Statistics and Research Agency.

Number of people per 100,000 ever diagnosed with Chronic Obstructive Pulmonary Disorder (COPD), by standard of living, 2004 -12
