Sub/ : Supply of Sanitarywares.

 $\frac{1}{4}$

Dear Sir,

The house owners with vision are now given serious
thought to their sanitarywares requirements in / their newly
built houses. The “Alfa Sanitarywares factory” is prepared to
solve your problem and help mark your house a / shining
example of cleanliness and trouble free services.

 $\frac{1}{2}$ $\frac{3}{4}$

Here is your opportunity to deal with us and take
advantage // of our factory prices, just as many other
discerning house builders are doing. Large stock of quality
wares are available / in our stores to enable us to give prompt
attentions to your orders for sanitary fittings. We supply our
goods / under our “factory prompt service” scheme according
to which our customers get extra services without extra cost
the kind of / attention you would want to have.

1

 $1\frac{1}{4}$ $1\frac{1}{2}$ $1\frac{3}{4}$

3

We are sending a price list and the photograph card
to enable you to // have a bird's eyes view of the range of our 2
products. Test them in anyway you like. We are sure / that the $2\frac{1}{4}$
extra whiteness and strength of our products will bear them
out in any test. We also produce goods / in various other $2\frac{1}{2}$
colours.

Each product of our factory is the outstanding value
in its particular class manufactured to give / maximum $2\frac{3}{4}$
service, and the moderate cost will just surprise you.

Each product is packed to make it stand out and // 3
attract the customer's attention – actually selling itself. Each
product and part of service is accompanied with a guarantee.

The attached / card is postage paid one. Fill it in and $3\frac{1}{4}$
mail it at the first available opportunity. Without obligation we
will / send our man to your place to make estimate of your $3\frac{1}{2}$
requirements and expenses thereon.

We assure you that you / will profit by dealing with $3\frac{3}{4}$
us so be sure to dispatch the card today.

Very truly yours,

For the Alfa Sanitarywares Factory// 4

The Commissioner,
Kota Division,
Kota (Rajasthan) /

 $\frac{1}{4}$

Sub : Detailed information of damage caused
by rain and flood.

Dear Sir,

With reference to your letter No. 224-F / 098 of
March, 14, 2010, regarding the damage caused by heavy rains
and floods in the Banas Nadi, I have/ the honour to you I have
now received detailed reports from the patwaris of several
villages.

 $\frac{1}{2}$ $\frac{3}{4}$

The damage inflicted // is so considerable that about
half the huts of the village Rampur have disappeared and
about one quarter of the / populated part of the village
Rasidpur is buried under water. These two villages have
suffered the greatest damages, though report from / other six

1

 $1\frac{1}{4}$ $1\frac{1}{2}$

villages are also very pathetic. Two hundred and thirty persons
are reported as dead, eighty nine missing while one / hundred $1\frac{3}{4}$
and fifty nine have been admitted to local hospitals. The poor
cultivators have lost their huts, standing crops and cattle // 2
and are now a miserable state.

Relief camps have been opened in all these villages
and rescue work is in full swing. / Free distribution of food and $2\frac{1}{4}$
clothes has also been undertaken, but the resources are not in
proportion to the / need. There is a great need of some official $2\frac{1}{2}$
assistance, in various shapes and forms without which
adequate help cannot / be given to the suffering villagers. The $2\frac{3}{4}$
Sewa Samity Association and Human Life Saving Society are
doing excellent work. Many // N.G.O's and private relief 3
societies are working for the help of suffering people of these
villages. They are / arranging medicines, food, shelter to live in $3\frac{1}{4}$
and distributing clothes etc. Everybody of the neighbouring
villages is open heartedly working / and helping the affected $3\frac{1}{2}$
people. But they want more help from the government.

I am of the opinion that the / government machinery $3\frac{3}{4}$
should be moved to launch a more vigorous relief campaign
without loss of time.

Yours faithfully,

(A. K. Singh)

Collector. // 4

Section - C

3. 30
- It can't be denied that the world has progressed in all spheres of life by leaps and bounds. Our life, / these days, is certainly more comfortable than that of our forefathers. And yet, the question is, are we happier than / them ? A comparison of the life at the time of our forefathers and the life as it is lived today / will, undoubtedly raise the mystery curtain. $\frac{1}{4}$
 $\frac{1}{2}$
 $\frac{3}{4}$
- In the by-gone days, our forefathers had to travel on foot for long // distances, or used the bullock-carts for this purpose. Therefore, communication and personal contact between people of different villages were / very limited. But now the situation is absolutely changed. Today, we have the most sophisticated means of transport and communication./ We can travel long distances not only on land by means of a motor car or a bus but over / the sea in ships and through the air in aeroplanes. The barriers of distance, high mountains or long stretches of deep // water, have lost their importance. 1
 $1\frac{1}{4}$
 $1\frac{1}{2}$
 $1\frac{3}{4}$
 2
- We can converse with our friends and relatives anywhere in the world, using telephones, / telegraph, fax, e-mail, or internet. $2\frac{1}{4}$
- We have strong, sturdy, comfortable houses in which we live in, whereas, our ancestors lived / in mud houses, which were, of course, naturally, warm in winter and cool in summer. However, they were air-less and / far less comfortable than modern houses. They also tended to collapse and dissolve during the rainy season. $2\frac{1}{2}$
 $2\frac{3}{4}$
- We have amenities // like the refrigerator to preserve and cool perishable food stuffs. We have all kinds of electrical gadgets to help us / swiftly complete our work with ease and 3
 $3\frac{1}{4}$

speed. The washing machine, the dish washer, the vacuum cleaner, the mixer-grinder, / the micro-wave oven and so on have all been designed to help the housewife complete her work in the / shortest possible time. Our ancestors could not even dream of such highly useful appliances.

$3\frac{1}{2}$
 $3\frac{3}{4}$

And to keep us joyfully busy // during our leisure-time, we have the television and video to entertain us, if we do not have inclination to / go to a cinema show. We can pursue hobbies, like photography, which again was unknown to our ancestors.

4
 $4\frac{1}{4}$

The highly / sophisticated inventions at our disposal today would seem like miracles to our forefathers. The progress in medicine has increased our / life-span and conquered the most devastating diseases like smallpox, cholera, polio and tuberculosis, which were considered fatal in earlier // times. We have the most remarkable machinery such as the CAT scan, electrocardiogram and so on to check up / the organs of the human body. The X-ray gives an accurate photograph of any internal part of the body. Progress / in technology has given us the best of roads, bridges, cars, buses, trains, aeroplanes and contributed a lot to the / industrial development. All this was missing in ancient times.

$4\frac{1}{2}$
 $4\frac{3}{4}$
5
 $5\frac{1}{4}$
 $5\frac{1}{2}$
 $5\frac{3}{4}$

Our entire lifestyle has undergone a complete transformation. Even the // position of woman is very different now. They are no longer confined to the four walls of the home but / work shoulder to shoulder with man. Art and culture are now highly developed. In fact, no aspect of life has remained / untouched these days by modernization.

6
 $6\frac{1}{4}$
 $6\frac{1}{2}$

But the tragedy is that inspite of all this progress, happiness and contentment are still / eluding us. We have lost peace of the mind, contentment and tranquility that was the hall mark of life of our ancestors.//
