**SECTION B**

You do not need the case study to answer these questions.

- 3 (a) The diagram below shows three terms associated with cyber security and three descriptions.

Draw a line to connect each term to the correct description. [3]

<b>TERM</b>
<b>Confidentiality</b>
<b>Integrity</b>
<b>Availability</b>

<b>DESCRIPTION</b>
<b>An assurance that the information is trustworthy and accurate</b>
<b>A guarantee of access to the information which is required</b>
<b>Protecting the information from being disclosed to unauthorised individuals</b>

- (b) Identify the type of cyber security incident from the definition given. [3]

Definition	Type
Making the data irretrievable	
Altering the data	
Account lockouts or denial of service	

- 4 (a) Daniil stores his data on a memory stick. He is concerned that if he loses the memory stick, his data could still be accessed. He has been told that he should encrypt the data on the memory stick.

Explain how encryption could be used to protect the data on the memory stick.
