PHYSIOTHERAPY TECHNIQUES HSSC-II

Time allowed: 2:35 Hours

Total Marks Sections B and C:

Student Bounty.com Answer any ten parts from Section 'B' and any three questions from Section 'C' on the separately provided answer book. Use supplementary answer sheet i.e. Sheet-B if required. Write your answers neatly and legibly.

SECTION - B (Marks 50)

Attempt any TEN parts. The answer to each part should not exceed 2 to 5 lines. $(10 \times 5 = 50)$ Q. 2

- What is the difference between Pleural effusion and Asthma? (i)
- Can Resisted Exercises be done in patient with Muscular Dystrophy without giving importance to (ii) fatigue? Give reasons for your answer.
- (iii) What do you understand by Gout?
- Write down the nerve supply of the following muscles: (iv)
 - Gluteus medius (a)
 - (b) Tibialis posterior
 - (c) Pronator teres
 - (d) Triceps
 - Subscapularis (e)
- (V) What do you understand by Relaxation?
- What are the functions of Hypothalamus? (vi)
- Differentiate between Cerebral palsy and Erb's Palsy. (vii)
- Give the position of claw hand. (viii)
- (ix) Define Fracture.
- What do you understand by Relaxed Passive Movements? (x)
- (xi) Name five movements permitted by the shoulder joints.
- (xii) Briefly write about Synergists and Fixators.
- What is the difference between good and a poor posture? (xiii)

SECTION - C (Marks 30)

Note:-Attempt any THREE questions. All questions carry equal marks. $(3 \times 10 = 30)$

- Give the general features of spinal cord. Name any disease affecting spinal cord in neurology. 0.3
- Q. 4 Give a detailed account of cerebral palsy.
- Q. 5 How can Talipes Equinovarus (TEV) be treated from Physiotherapy? Write in detail.
- Define Torticollis and give the details of physiotherapy measures in treating new born babies and infants. Q. 6
- Describe the principles of treatment adopted to carry out with physiotherapy treatment. Q. 7
