### Accidents in the home

Many accidents happen in people's homes each year. All age groups are affected. Some accidents can be serious. Here are the most common examples.

#### Poisons

In Rivermouth around 15 children under the age of five go to hospital each year after being accidentally poisoned.

#### Falls and Bumps

Falls normally happen on stairs but may also happen on level floors. About 25% of accidents in the home are caused when people bump into something or an object hits them.

#### Cuts

Each year about 70 people go to Rivermouth Hospital with cuts from broken glass.

#### Choking

Children under five years old are most at risk from choking on things.

#### Scalds

Babies and old people suffer most from scalds caused by hot liquids.

#### Burns

Last year 97 injuries were caused in Rivermouth by fires in the home.

### How To Make Your Home Safe

Here are some tips on avoiding accidents in the home.

#### Stairs

Make sure stair handrails are secure and the stairs are well lit. Loose handrails and poor lighting are common causes of accidents.

#### Floors

Mop up spills immediately to prevent people from slipping and get uneven floors levelled as they may cause trips.

Always wear shoes, slippers or socks as bare feet are at risk of injury.

#### Fire

Make sure your home has a smoke alarm and never leave a chip pan unattended.

#### Children

- Don't let children play in the kitchen.
- Clear up broken glass quickly and put it in a safe place, otherwise a child may tread on it.
- Keep small objects like coins out of reach of young children, who may put them in their mouth.
- Keep hot drinks out of the reach of children.
- Keep cleaning fluids and medicines locked away.
