## Biology

Unit 1 Higher Tier

### 

### [GBY12]

\*GBY12\*

### FRIDAY 5 JUNE, AFTERNOON

#### TIME

1 hour 30 minutes.

#### INSTRUCTIONS TO CANDIDATES

Write your Centre Number and Candidate Number in the spaces provided at the top of this page.

You must answer the questions in the spaces provided.

Do not write outside the boxed area on each page or on blank pages.

Complete in blue or black ink only. **Do not write with a gel pen.** 

Answer **all twelve** questions.

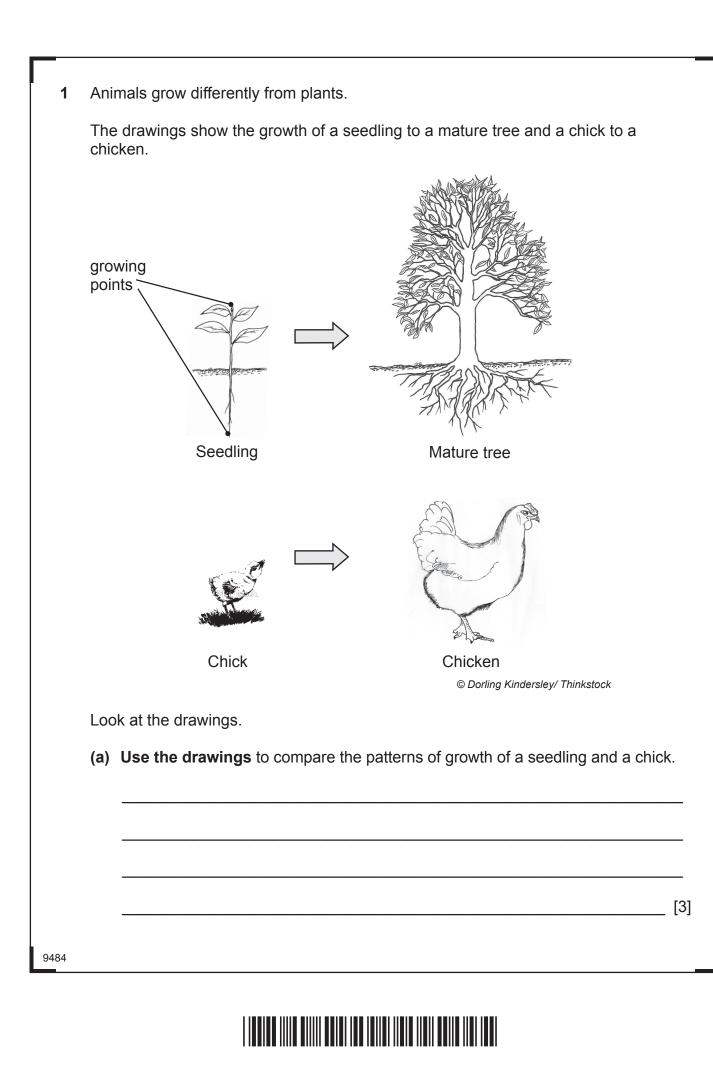

#### INFORMATION FOR CANDIDATES

The total mark for this paper is 100.

Figures in brackets printed down the right-hand side of pages indicate the marks awarded to each question or part question.

Quality of written communication will be assessed in Questions 4 and 12(e).

4 The table shows the results of food tests carried out on a biscuit.

Test reagent	Reagent colour at start	Result of food test
Benedict's	blue	positive
Ethanol	clear	positive
Biuret	blue	negative
lodine	yellow/brown	positive

© CCEA

Look at the table.

Use the information in the table to draw conclusions about the types of food in the biscuit.

Describe the colour change for each food test.

In this question you will be assessed on your written communication skills, including the use of specialist scientific terms.

**10** (a) The table shows the biomass of organisms at each trophic level in a food chain.

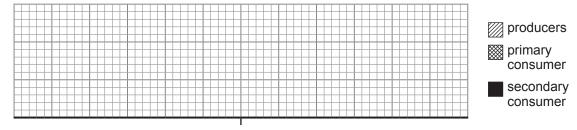

Trophic level	Biomass/g m⁻²
Producers	11 000
Primary consumers	800
Secondary consumers	40

(i) Use the information in the table to draw a pyramid of biomass.

Use a scale of 5 small squares to represent 1000 g m<sup>-2</sup>.

Use the key shown.

9484

- [3]
- (ii) Give one advantage and one disadvantage of using a pyramid of biomass rather than a pyramid of numbers.

Disadvantage	

\*36GBY1224\*

D

(b) The diagram shows the flow of energy through a food chain.

The values are for 1m<sup>2</sup> of ground.

(i) Calculate the percentage of energy reaching the primary consumer which is available to the secondary consumer.

Show your working.

- \_\_\_\_\_% [2]
- (ii) Explain two reasons for this decrease in energy available to the secondary consumers.

(iii) Charities provide people living in countries suffering from famine with rice or cereals rather than meat.

\_\_\_\_\_ [2]

Use evidence from the food chain to explain why.
