

Leave  
blank

**Answer ALL the questions. Write your answers in the spaces provided.**

1. The table below shows some tools, equipment and mechanisms.

(a) Complete the table by

- (i) naming each tool, piece of equipment or mechanism  
(ii) describing its use

The first one has been done for you.

Tool/Equipment/Mechanism	Name	Use
	Brazing torch	Hard soldering metals together
		
		
		

(6)

- (b) The drawing below shows a brazing torch. It is used for hard soldering or brazing.

One safety precaution when using a brazing torch is ‘do not wave the torch around’.

Give **two other** safety precautions when using a brazing torch.

- 1 .....  
2 ..... (2)

- (c) The drawing below shows a child’s mechanical toy.

The body and tail of the animal move when the handle is turned.

A mechanical system can be divided into three stages:

**INPUT – PROCESS – OUTPUT**

Using the terms INPUT, PROCESS and OUTPUT, clearly label on the drawing

- one INPUT
- one PROCESS
- one OUTPUT

3

Turn over

Leave  
blank

2. (a) The drawing below shows a wheelbarrow.

- (i) In the table below, mark with a cross () the correct term for parts A, B and C.

Part	Term		
A	Effort <input checked="" type="checkbox"/>	Load <input checked="" type="checkbox"/>	Fulcrum <input checked="" type="checkbox"/>
B	Effort <input checked="" type="checkbox"/>	Load <input checked="" type="checkbox"/>	Fulcrum <input checked="" type="checkbox"/>
C	Effort <input checked="" type="checkbox"/>	Load <input checked="" type="checkbox"/>	Fulcrum <input checked="" type="checkbox"/>

(3)

- (ii) Identify the class of lever used in the wheelbarrow.

.....  
(1)

- (b) The drawing below shows a hand drill.

- (i) The hand drill uses bevel gears to drive the chuck.

Describe how the bevel gears drive the chuck when the handle is turned.

.....  
.....  
(2)

Leave  
blank

- (ii) Calculate the speed of the chuck gear if the handle is turned at 100 rpm.  
There are 80 teeth on the handle gear and 20 teeth on the chuck gear.

Use the formula

$$\text{chuck speed} = \text{handle speed} \times \frac{\text{number of teeth on handle gear}}{\text{number of teeth on chuck gear}}$$

.....  
Chuck speed = Number ..... Unit .....

(2)

- (c) The drawing below shows a gear system used in a pillar drill. The gear system is used to move the chuck up and down.

- (i) Name the gear system used to move the chuck up and down.

.....  
(1)

- (ii) The handle is used to give the input to the gear system.

Give the technical term for this motion.

.....  
(1)

- (iii) The up and down movement of the chuck is the output of this gear system.

Give the technical term for this motion.

.....

Leave  
blank

3. The drawing below shows details of a DIY workbench.

- (a) Two specification points for the DIY workbench are that it must:

- fold for storage
- be able to clamp different sizes of material

Under each of the following headings, give **one** more point that should be included in the specification for the DIY workbench.

For each point, give **one** reason why it should be included.

(i) **Market**

Point .....

Reason .....

(2)

(ii) **Quality**

Point .....

Reason .....

(2)

(iii) **Environment**

Point .....

Reason .....

(2)

Leave  
blank

- (b) The frame of the workbench is made from steel.  
One reason for using steel is that it can be finished using a plastic coating.
- (i) Give **two** other reasons why steel is a suitable material from which to make the frame.
- 1 .....  
2 ..... (2)
- (ii) Give **two** reasons why plastic coating is a suitable finish for the frame.
- 1 .....  
2 ..... (2)
- (c) The worktops are made from 20 mm thick plywood. Plywood is made from several layers of wood glued together.
- Give **two** properties of plywood that make it more suitable for the worktops than a single piece of solid wood.  
For each property, give **one** reason why it makes plywood suitable.
- Property .....  
Reason .....  
Property .....  
Reason ..... (4)
- (d) Quality control checks are carried out at important stages during the manufacture of the DIY workbench.
- Name **two** important quality control checks that should be carried out during the manufacture of the DIY workbench.
- 1 .....  
2 ..... (2)

- (e) The plastic handles are made in high volume from a thermoplastic using the injection moulding process.  
The shape of the handles makes them suitable to be made from a thermoplastic.

The drawing below shows a thermoplastic handle.

Describe **one** way in which the shape of the handle makes it suitable to be made from a thermoplastic.

.....  
.....

(2)

- (f) Two purposes of the DIY workbench are that it must:

- fold for storage
- be able to clamp different sizes of material

Explain, under the following headings, how the DIY workbench achieves these purposes.

- (i) Fold for storage.

.....  
.....  
.....

(2)

- (ii) Be able to clamp different sizes of material.

.....  
.....  
.....
