

Sample F7

Write your answers to Section A Questions (a) and (b) here:

7) a) i) ~~dragging~~ dragging - this is a Verb
 chased - this is an adverb
 like Australian Marsupial - this is a Simile

ii) The colour of their skin ^b ~~both~~
 Then ~~a~~ his fellow white men
 "But of course our biggest bugbear
 was the colour of their skin....
 Black"

This shows when John was
 being brought up that he had
 a racist view towards black
 people. It also shows that
 the simple fact of their skin
 being black means they don't have
 a sense of equality in their
 society

Sample F7

Thon thinks of an 'Australian Aborigine' as an almost Zoo like creature.

"almost Zoological" - shows that Thon was so ignorant of Black people and their Culture, & he also has this pre-judged image in his head about aboriginals, that he goes anywhere with already a fixed opinion.

Reinforces my last point.

"... some evil brush. Black was black"

Shows that when he has any contact or sees a black man, woman or child that he would have a ~~that~~ ~~pre~~ already an opinion & a negative image due to the media and ~~the~~ ~~Gener-~~ Generations of racism.

Sample F7

b) "walk through a see of indians eyes" this shows that ~~the~~ Shores parents were really happy to be their but they were afraid of the aboriginal people were going to judge them this also ~~that~~ links in with the fact that the aboriginal people were very forgiving and that they were ok with the ceremony and that Shores parents had the skull they just wanted the remains back because they wanted them to be buried, ~~an~~ indeed they thought that you had to bury the indigenous people for them to go into the next life.

"Leaves of my laughter"

this shows that ~~that~~ ~~an~~ ~~ind~~ when you talk to the aboriginal people, they are just normal people and they are not killers, rapists or criminals, they are just normal human beings like anyone, but because

Sample F7

one physical difference, people will not
talk to them, serve ~~to~~ them, racism
has almost completely disappeared in
the western world, but in Australia
this book shows that it is still
very much alive, even if it's not so
obvious.
