

General Certificate of Secondary Education

B234

Manufacturing

Unit B234: Impact of modern technologies on manufacturing

Specimen Paper

Time: 1 hour

Candidates answer on the question paper.

Additional materials:

Candidate
Forename

Candidate
Surname

Centre
Number

--	--	--	--	--

Candidate
Number

--	--	--	--

INSTRUCTIONS TO CANDIDATES

- Write your name in capital letters, your Centre Number and Candidate Number in the boxes above.
- Use black ink. Pencil may be used for graphs and diagrams only.
- Read each question carefully and make sure you know what you have to do before starting your answer.
- Answer **all** the questions.
- Do not write in the bar codes.
- Do not write outside the box bordering each page.
- Write your answer to each question in the space provided.

INFORMATION FOR CANDIDATES

- The number of marks for each question is given in brackets [] at the end of each question or part question.
- The total number of marks for this paper is 60.

16	

This document consists of **7** printed pages and **1** blank page.

Answer **all** questions.

- 1 For each products listed below select the correct sector they are manufactured in.

SECTORS

Chemical and Pharmaceutical
Clothing and Textiles
Motor manufacturing
Food and Drink
Furniture
Machinery and Equipment
Packaging
Electronic and Communications

Product:

Gluten free ready meal.....

Lipstick.....

Outdoor sportswear.....

Touch screen.....

Vacuum cleaner.....

Sandwich carton.....

Child's cot.....

[7]

- 2 Tick **one** of the following products which you will use to answer the following questions:

- Gluten free ready meal
- Lipstick
- Outdoor sportswear
- Touch screen
- Vacuum cleaner
- Sandwich carton
- Child's cot
- Holiday brochure
- Windscreen wiper blade
- Security light bulb

For your chosen product state one **technology** used:

Technology.....[1]

For your chosen product state one **benefit** of using that technology:

Benefit.....[1]

3 Name **one** specific tool or item of equipment you have used to manufacture a product and describe how to use it safely.

Tools/equipment.....[1]

Safe use.....

.....

.....[2]

4 Describe **two** features of a product you have studied that show it has been designed for manufacturing assembly.

Name of product:.....

1.....

.....

.....[2]

2.....

.....

.....[2]

5 Connect **one** manufacturing sector to a standardised component used in that sector.

SECTOR

chemical and pharmaceutical
clothing and textiles
electrical
food and drink
furniture
packaging
machinery and equipment
electronic and communications
paper and print
motor manufacturing

COMPONENT

zip fasteners
castors
nuts and bolts
child resistant containers
brake linings
3 pin plug
polystyrene beads
A4 card
LEDs
Chocolate vermicelli

[1]

- 6 Choose a **different** manufacturing sector and connect it to a standardised component used in that sector.

SECTOR	COMPONENT
chemical and pharmaceutical	zip fasteners
clothing and textiles	castors
electrical	nuts and bolts
food and drink	child resistant containers
furniture	brake linings
packaging	3 pin plug
machinery and equipment	polystyrene beads
electronic and communications	A4 card
paper and print	LEDs
motor manufacturing	Chocolate vermicelli

[1]

- 7 Sustainability and consideration of the environment are important issues in manufacturing. Give **two** factors to consider when deciding upon the selection of materials or components

Factor 1

..... [2]

Factor 2

..... [2]

- 8 Tick the **two** most important issues to consider when deciding whether to buy in pre-processed materials rather than to process them on site.

- Marketing
- Packaging costs
- Space requirements
- Machinery costs
- Material properties
- Assembly methods
- Quality

[2]

- 9 One consideration in Design for Manufacturing Assembly (DFMA) is **handling**

Tick **two** issues when considering handling.

- Marketing
- Packaging costs
- Space requirements
- Material properties
- Assembly methods
- Quality

[2]

10 Describe a different consideration for each area below when designing for lean manufacture.

materials
.....
..... [2]

manufacturing processes
.....
..... [2]

quality control
.....
..... [2]

11 (a) Tick **two** items that are scrap.

- Contaminated materials
- Spare materials for recycling
- Offcuts that could be reused
- Faulty products that cannot be reworked or sold on
- Spare components

[2]

(b) Describe in detail how **one** specific type of scrap can be generated during the manufacturing process.

.....
.....
..... [2]

12 Discuss the importance of Just In Time (JIT) in reducing costs and improving manufacturing efficiency.

.....
.....
.....
.....
.....
.....
.....
.....
.....
..... [6]

Symbol 2 ⇨

- Delay
- Transport
- Storage
- Inspection

[1]

15 Explain the contribution of flow process charts to lean manufacture.

.....

.....

.....

.....

[4]

16* Discuss the impact of Design for Manufacturing Assembly (DFMA) on manufactured products.

.....

.....

.....

.....

.....

.....

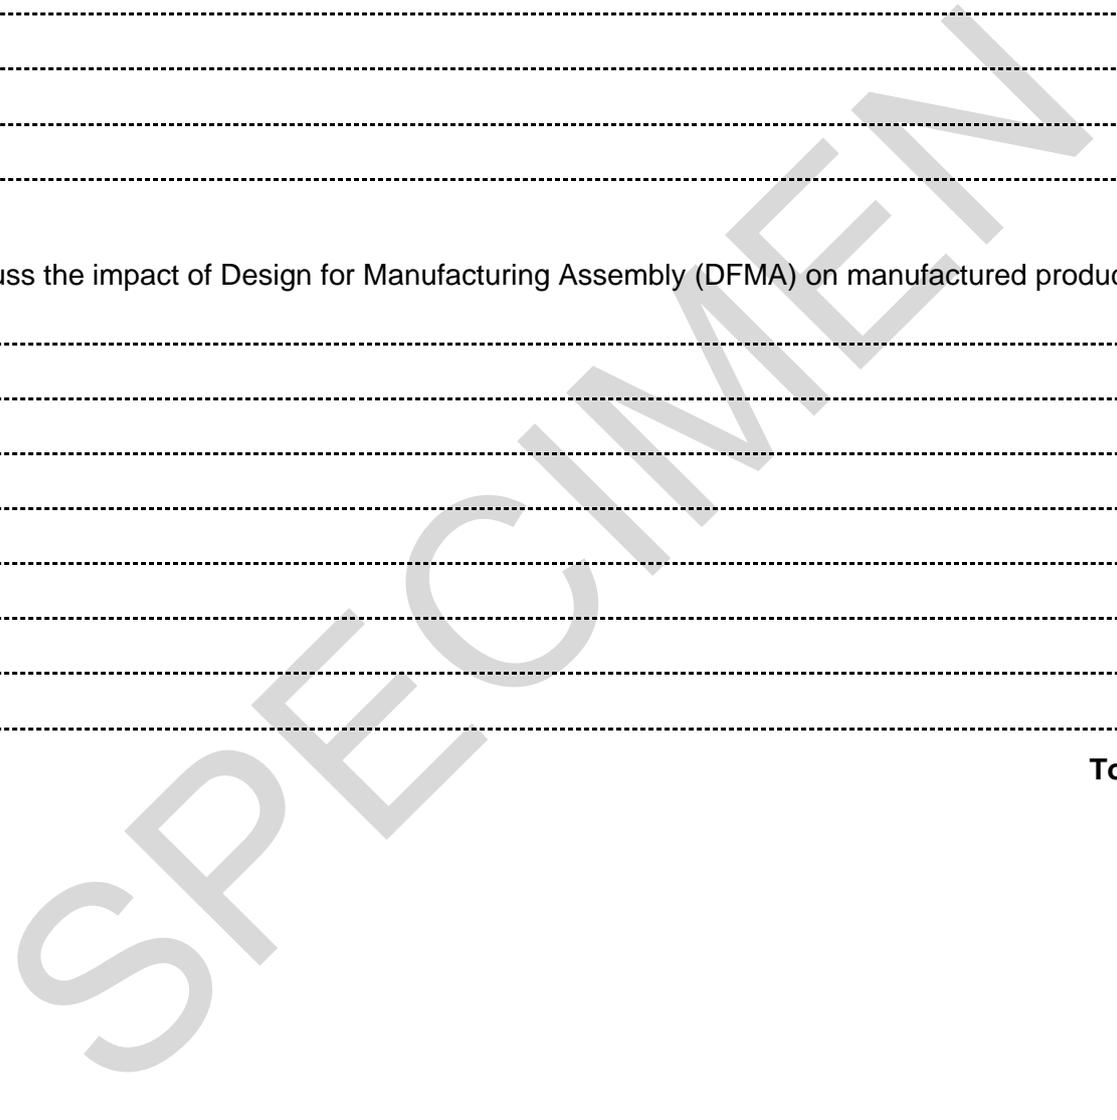

.....

.....

.....

[6]

Total [60]

Question Number	Answer	Max Mark
7	<p>Sustainability and consideration of the environment are important issues in manufacturing. Give two factors to consider when deciding upon the selection of materials or components.</p> <p>Labels, buttons, resistors, transistors, wood screws, foil trays, washers...</p> <p>2 marks for each appropriate factor with expansion given eg: Environmental impact(1) material obtained from sustainable source therefore reducing impact on the environment(1)</p> <p>One mark only for factor not expanded, eg availability, cost.</p>	[4]
8	<p>Tick the <u>two</u> most important issues to consider when deciding whether to buy in pre-processed materials rather than to process them on site.</p> <p><input type="checkbox"/> Marketing</p> <p><input type="checkbox"/> Packaging costs</p> <p><input type="checkbox"/> Space requirements</p> <p><input type="checkbox"/> Machinery costs</p> <p><input type="checkbox"/> Material properties</p> <p><input type="checkbox"/> Assembly methods</p> <p><input type="checkbox"/> Quality</p> <p>One mark for each of 2 from: Space requirements Machinery costs Quality</p>	[2]
9	<p>One consideration in Design for Manufacturing Assembly (DFMA) is handling</p> <p>Tick <u>two</u> issues when considering handling.</p> <p><input type="checkbox"/> Marketing</p> <p><input type="checkbox"/> Packaging costs</p> <p><input type="checkbox"/> Space requirements</p> <p><input type="checkbox"/> Material properties</p> <p><input type="checkbox"/> Assembly methods</p> <p><input type="checkbox"/> Quality</p> <p>One mark for each of 2 from: Material properties Assembly methods Space requirements</p>	[2]

Question Number	Answer	Max Mark
10	<p>Describe a different consideration for each area below when designing for lean manufacture.</p> <p>Materials</p> <p>Manufacturing processes</p> <p>Quality control</p> <p>2 marks for clear description of a consideration related to each area (one for a single point):</p> <p><u>Materials</u> processing requirements (1) physical properties (1) to suit product specification(1) cost(1) availability(1) form supplied(1)</p> <p><u>Manufacturing processes</u> Processing times(1) Reliability/efficiency(1)make to meet spec(1)cost of equipment(1)</p> <p><u>Quality control</u> Inspection points(1)Improvement in reject rate(1)cost(1) of automatic equipment(1)/staffing.</p>	[6]
11(a)	<p>Tick <u>two</u> items that are scrap.</p> <p><input type="checkbox"/> Contaminated materials</p> <p><input type="checkbox"/> Spare materials for recycling</p> <p><input type="checkbox"/> Offcuts that could be reused</p> <p><input type="checkbox"/> Faulty products that cannot be reworked or sold on</p> <p><input type="checkbox"/> Spare components</p> <p>One mark each for spare materials for recycling and offcuts that could be re-used</p>	[2]
11(b)	<p>Describe in detail how <u>one</u> specific type of scrap can be generated during the manufacturing process.</p> <p>Chemical and Pharmaceutical</p> <ul style="list-style-type: none"> -lipstick misshapes reformed - powder from tableting (can be re-pressed) <p>Clothing and textiles</p> <ul style="list-style-type: none"> - small offcuts /materials at end of runs (sold on) <p>Electrical and IT</p> <ul style="list-style-type: none"> - faulty pcbs (sent for stripping) <p>Food and drink</p> <ul style="list-style-type: none"> - outer leaves from trimmed vegetables <p>Furniture</p> <ul style="list-style-type: none"> - wood/metal offcuts <p>Machinery and Equipment</p> <ul style="list-style-type: none"> - over ordered components <p>Packaging</p> <ul style="list-style-type: none"> - offcuts from platens 	[2]

Question Number	Answer	Max Mark
12	<p>Discuss the importance of Just in Time (JIT) in reducing costs and improving efficiency</p> <p>Six marks for discussion giving three relevant points, stating why two are relevant and giving an example. Or for the critical evaluation of the importance of JIT (showing an understanding of JIT)</p> <p>For example:</p> <ul style="list-style-type: none"> • Products are scheduled to meet orders received • Be finished when dispatch is due • Materials and components are delivered to workstations • As needed for production • This means there is no waiting time • And stocks of finished product are not needed to meet orders • So no extras are made • Less storage space needed • Availability of resources as required <p>Identification and expansion of any of the above. List is not exhaustive.</p>	[6]
13	<p>Discuss how and why production plans may need to be modified following a new product launch</p> <p>Six marks for discussion giving three relevant points, stating why two are relevant and giving an example.</p> <p>For example: (Discussion could follow the success of otherwise of the product)</p> <ul style="list-style-type: none"> • Materials needed – increased/decreased quantities • Workers or workstations needed – increased/decreased • Tools/equipment – increase/decrease to produce more or less • Need for extra machines to produce more • Line speed or rate doubled or additional line or reduction • Storage for extra materials • Stock ready to dispatch <p>Identification and expansion of any of the above. List is not exhaustive.</p>	[6]

Question Number	Answer	Max Mark
15	<p>Explain the contribution of flow process charts to lean manufacture.</p> <p>Four marks for detailed explanation: Flow process charts are used when analyzing the steps in a process, to help identify and eliminate waste. They show each step of a process in order (1) graphically(1), making it easier to see where time is being wasted(1)/identify idle time(1).</p>	[4]
16*	<p>Discuss the impact of Design for Manufacturing Assembly (DFMA) on manufactured products.</p> <p>For example: Common fixing strategy(1) enables equipment reuse(1). Standardised components (1) reduces inventory(1) Complexity reduction (1) to facilitate automation (1) Make versus buy (1) Handling (1) Product prices may be reduced due to overall production cost savings(1) products may be shaped differently (1) eg draft angles(1) Less variety between products (1) form follows production(1) Level 1 (0-2 marks) Basic discussion showing some understanding of the impact of Design for Manufacturing Assembly (DFMA) on manufactured products. There will be little, or no, use of specialist terms. Answers may be ambiguous or disorganised. Errors of spelling, punctuation and grammar may be intrusive. Level 2 (3-4 marks) Adequate discussion showing an understanding of the impact of Design for Manufacturing Assembly (DFMA) on manufactured products. There will be some use of specialist terms, although these may not always be used appropriately. The information will be presented for the most part in a structured format. There may be occasional errors in spelling, punctuation and grammar. Level 3 (5-6 marks) Thorough analysis, showing a clear understanding of the impact of Design for Manufacturing Assembly (DFMA) on manufacture products. Specialist terms will be used appropriately and correctly. The information will be presented in a structured format. The candidate can demonstrate the accurate use of spelling, punctuation and grammar.</p>	[6]
