Unit 3

Friday 13 June 2014 9.00 am to 10.30 am

H

For this paper you must have:

- a calculator
- mathematical instruments.

Time allowed

- 1 hour 30 minutes

Instructions

- Use black ink or black ball-point pen. Draw diagrams in pencil.
- Fill in the boxes at the top of this page.
- Answer **all** questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- Do all rough work in this book.
- If your calculator does not have a π button, take the value of π to be 3.14 unless another value is given in the question.

Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 80.
- The quality of your written communication is specifically assessed in Questions 6, 15 and 18. These questions are indicated with an asterisk (*).
- You may ask for more answer paper, graph paper and tracing paper. These must be tagged securely to this answer book.

Advice

- In all calculations, show clearly how you work out your answer.

Formulae Sheet: Higher Tier

Area of trapezium = $\frac{1}{2} (a + b)h$

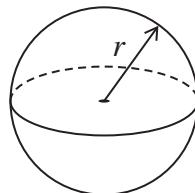

Volume of prism = area of cross-section \times length

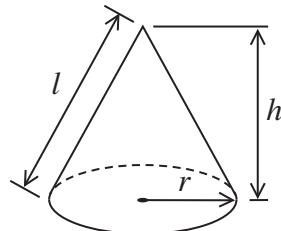

Volume of sphere = $\frac{4}{3} \pi r^3$

Surface area of sphere = $4\pi r^2$

Volume of cone = $\frac{1}{3} \pi r^2 h$

Curved surface area of cone = $\pi r l$

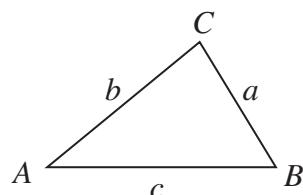

In any triangle ABC

Area of triangle = $\frac{1}{2} ab \sin C$

Sine rule $\frac{a}{\sin A} = \frac{b}{\sin B} = \frac{c}{\sin C}$

Cosine rule $a^2 = b^2 + c^2 - 2bc \cos A$

The Quadratic Equation

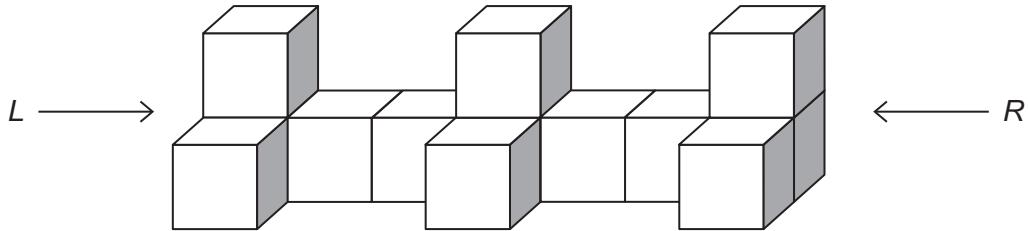

The solutions of $ax^2 + bx + c = 0$, where $a \neq 0$, are given by

$$x = \frac{-b \pm \sqrt{(b^2 - 4ac)}}{2a}$$

Answer **all** questions in the spaces provided.

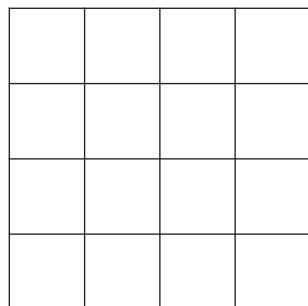

- 1 This solid shape is made from identical cubes.

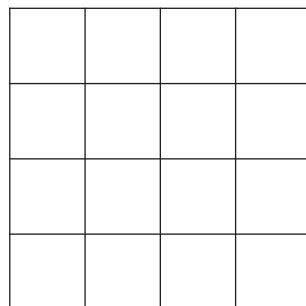

On the grids, draw the side elevations from *L* and *R* and the plan view.

[3 marks]

- 2 The diagram shows a full-size drawing of a drinking glass.
The glass is a cylinder with radius 3 cm and height 14 cm.

A man claims that the circumference of the rim is greater than the height of the glass.

Is he correct?

You **must** show your working.

- 5 (a)** Use the diagram to write an equation connecting x and y .

[1 mark]

Answer

- 5 (b)** The ratio $x : y = 2 : 3$

Use this information to write another equation connecting x and y .**[1 mark]**.....
.....

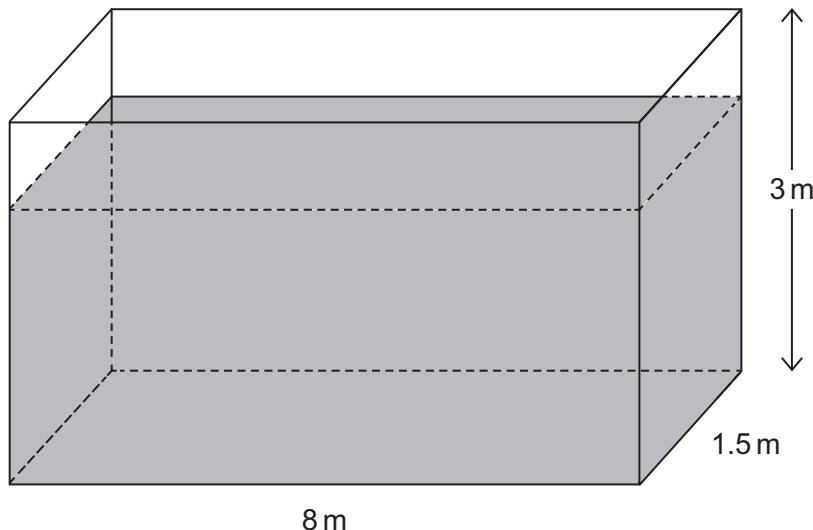

Answer

- 5 (c)** Work out the size of angles x and y .

[3 marks].....
..... $x = \dots$ degrees, $y = \dots$ degrees

*6

This water tank is a cuboid.

You are given that 1 cubic metre holds 1000 litres.

The tank is five-sixths full of water.

Water is leaking from the tank at a rate of 20 litres per minute.

How long will it take the tank to empty?

Give your answer in hours.

[5 marks]

Answer hours

7

The diagram shows a map of Poland.

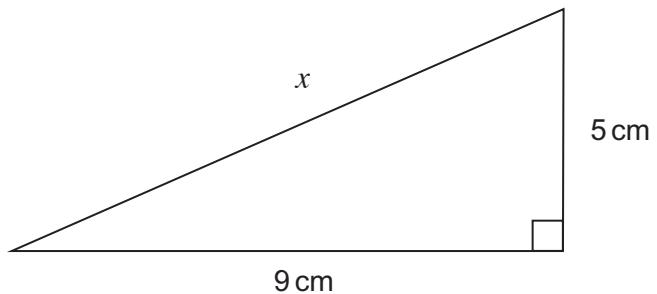

Choose one of the following three-figure bearings to complete each sentence correctly.

 045° 090° 035° 180° 225° 270° 315° 360°

7 (a) The bearing of Krakow from Gdansk is
[1 mark]

7 (b) The bearing of Gdansk from Poznan is
[1 mark]

- 9 An octagon is made by cutting four identical triangles from a square sheet of gold as shown.

- 9 (a) Show that the area of the octagon is 82 cm^2 .

[4 marks]

- 9 (b)** The original square sheet of gold has a value of £750

The octagon shape is made into a piece of jewellery.
This increases the value of the gold in the octagon shape by 90%

Work out the new value of the gold in the octagon shape.
