

DO NOT WRITE ON THIS PAPER	TIME – 2 hours	Paper 2 of 5 from ZigZag Education
Sample GCSE Examination Paper Intermediate tier non-calculator paper	Standard Equipment: pen, pencil, ruler, protractor. Compasses (Q17).	

1. A group of students survey the local population about their working hours and type of work. They summarise their findings in the following table:

	Men	Women
Office workers surveyed	8	5
Voluntary workers surveyed	4	9
Other workers surveyed	6	10
Average hours per week	33	31

A worker is selected at random.

- a) What is the probability that a woman is selected? [2]

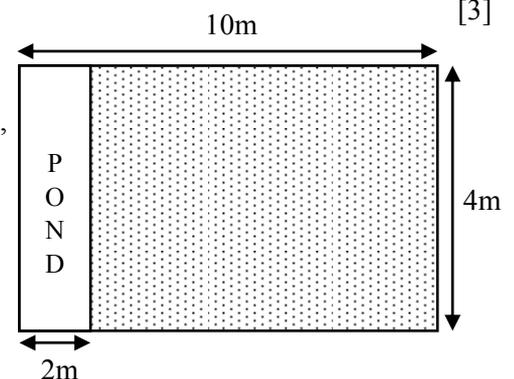

A student studies the average hours per week done by women using the table below.

	Women	Average hours per week	Total Hours Worked
Office workers surveyed	5	30	150
Voluntary workers surveyed	9	30	270
Other workers surveyed	10	x	y
ALL women surveyed	24	31	744

- b) Calculate the missing number, represented by the x . [3]

2. Sandy is designing his new lawn, and needs to know how much money he needs to buy turf. Turf is £5 per square metre. His garden, as shown in the diagram, has a rectangular pond at one end.

How much money will Sandy need for his lawn? [3]

3. a) Simplify:

- i) $y^5 \times y^2$
 ii) $4y + 3 - 2y$
 iii) $3y + 2y^2 - y$

- b) Solve:

- i) $6x - 12 = 18$
 ii) $24 - x = 3$

7 marks

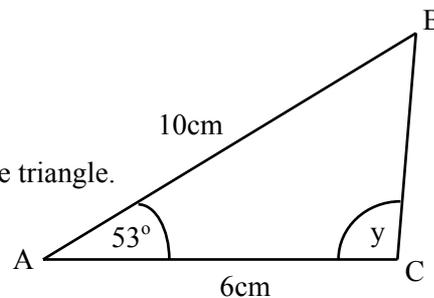

4. Continue the next two numbers of the following sequences:

- a) 4, 7, 10, 13,
 b) 12, 9, 5, 0,
 c) 1, 4, 9, 16,

5 marks

5. Here is a sketch of a triangle ABC .

- a) Construct a full scale, accurate drawing of the triangle.
 b) Measure the size of angle y .
 c) Find the perimeter of the triangle.

6 marks

6. Joe and Ashra buy a lottery ticket, which costs £1.

Joe contributes 80p and Ashra 20p.

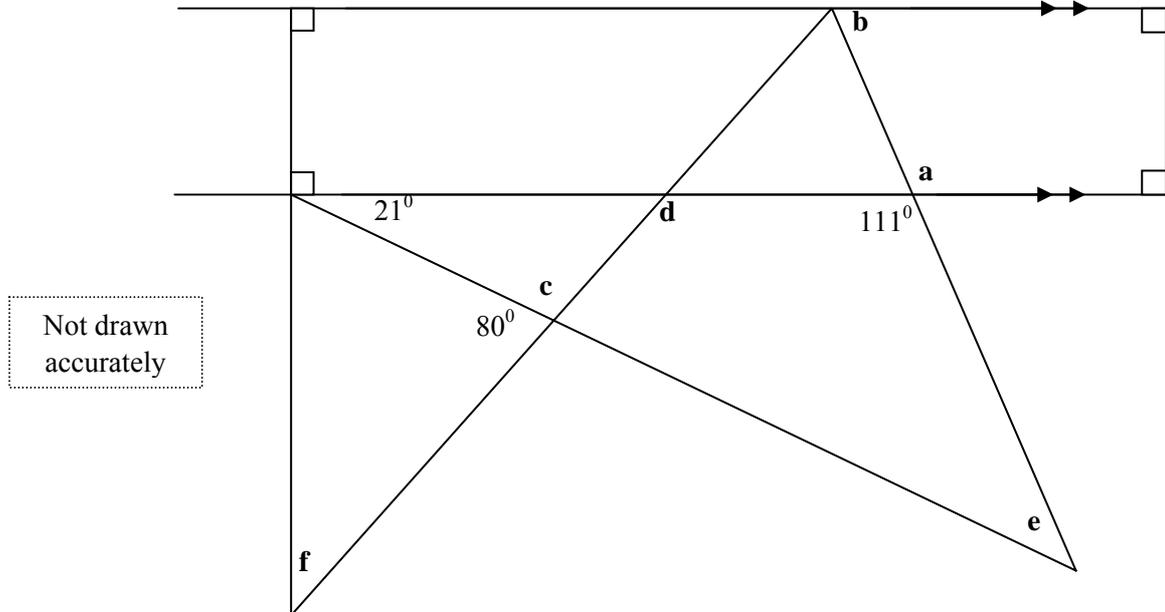

They win £50.

They divide their winnings in the same ratio as their contributions.

How much does Joe get? [2]

2 marks

7. Calculate the missing angles **a**, **b**, **c**, **d**, **e**, and **f**. 6 marks

8. *You will need graph or squared paper for this question.*
- Draw the graph of $y = 3x + 5$. Use values of x from and including 0 and up to and including 3.
 - Draw the line PQ where the coordinates of P and Q are P(2.5, 0) and Q(2.5, 14).
Write down the coordinates of where the 2 lines cross. 8 marks

9. Coffee jar A contains 450g of coffee and costs £4.50.
Coffee jar B contains 900g of coffee and costs £10.00.
You must show your working in this question to gain any marks.
- Out of these 2 jars which is the best value, *showing your working*.
Coffee jar C contains 1kg of coffee and costs £11.00.
 - List the jars of coffee from best value to worst value, *showing your working*.
Coffee jar D contains x g of coffee and costs £1.00. x is a whole number.
 - Calculate the smallest value of x such that Jar D is the best value out of the four jars.
 - Calculate the largest value of x such that Jar D is the worst value out of the four jars. 8 marks

10.
 - Estimate: $\frac{111 \times 0.0018}{12}$
 - Write 51^2 as the product of primes
 - Calculate $4 \times 1.2 \times 10^4$ and write your answer in standard form.
 - Calculate $\frac{1.2 \times 10^4}{3}$ and write your answer in standard form. 6 marks

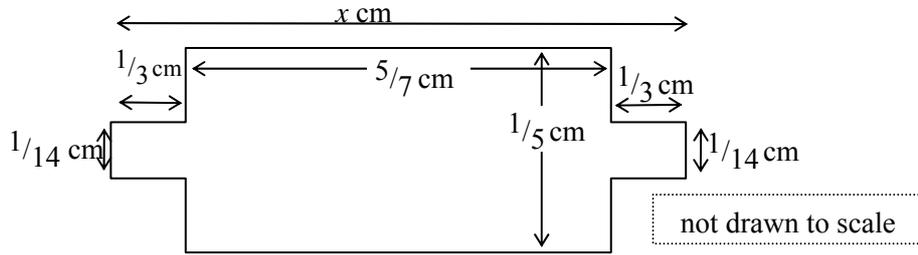

11. 30 students swim the length of the pool and their time is recorded.
Jim puts the results in the following table.
Estimate the mean time for the class. 4 marks
- | Time in seconds | Frequency |
|------------------|-----------|
| $10 < t \leq 20$ | 3 |
| $20 < t \leq 25$ | 10 |
| $25 < t \leq 35$ | 17 |

12.
 - Write down formulae to represent the n^{th} term of sequences i) and ii).
i) 5, 9, 13, 17, ... ii) $\frac{1}{2}, \frac{2}{3}, \frac{3}{4}, \frac{4}{5}, \dots$
 - Jim thinks of a number, times it by 3 and then adds 4.
If the result is x what did he start with?

- c) Jo thinks of a number. He tells John that his number is not a whole number. He also tells John that if he adds 50 to his starting number then this is the same as multiplying his starting number by 5.
- Formulate an equation in x which must be true; where x is Jo's starting number.
 - Solve the equation.

9 marks

13. In the following diagram find x and the perimeter and the area of the shape.

5 marks

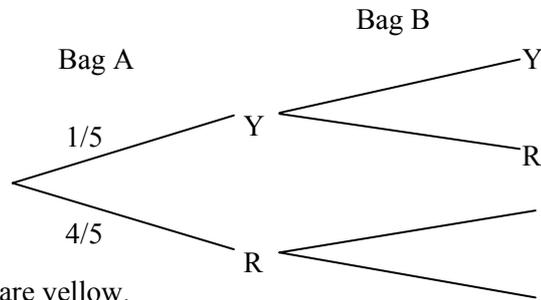

14. a) Solve the equation $10 - x = 2x - 10$ and write your answer as a mixed number.

b) Simply the expression: $\frac{x^2 - 9}{x - 3}$

15. There are two bags.

Bag A contains 1 yellow ball and 4 red balls.
 Bag B contains 1 yellow ball and 9 red balls.
 A ball is selected from bag A and then from B.

- Copy and complete the tree diagram
- Calculate the probability that both balls are yellow.

4 marks

16. John buys some skis in a sale. His skis were reduced by 10%. He pays £189.

- a) How much would he have paid if the skis had not been in the sale?

Joshua also buys some skis whose price before the sale is £212.12.

- b) Calculate the cost of Joshua's skis after the sale of 10% to the nearest penny.

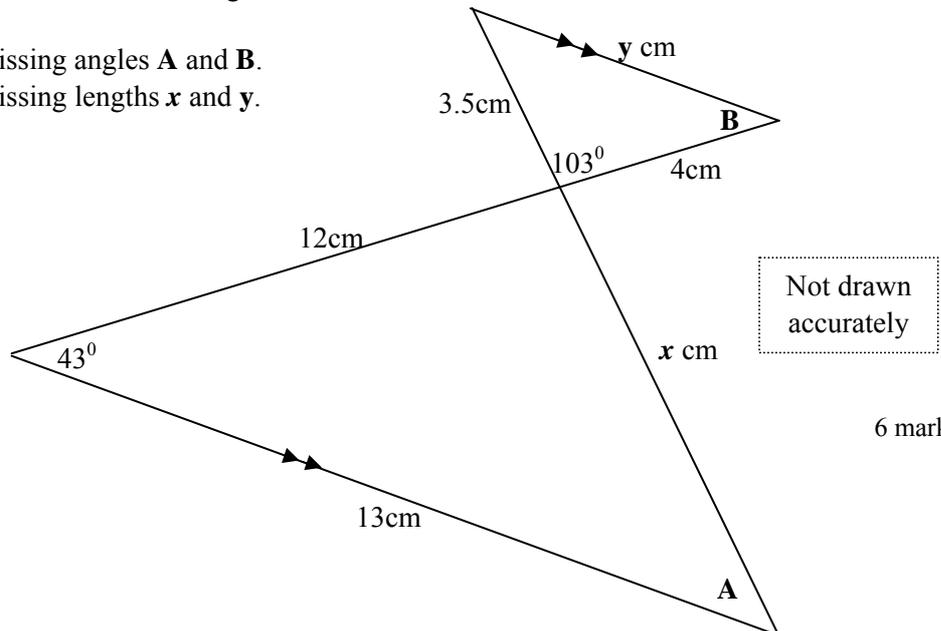

4 marks

4 marks

- Construct on plain paper the triangle ABC such that: $AB = 10\text{cm}$, $BC = 6\text{cm}$ and $AC = 9\text{cm}$.
- Measure the acute angle ABC to the nearest degree.
- Draw the line of points that are the same distance from AB and BC.
- Shade all the points inside the triangle that are less than 4cm from A.

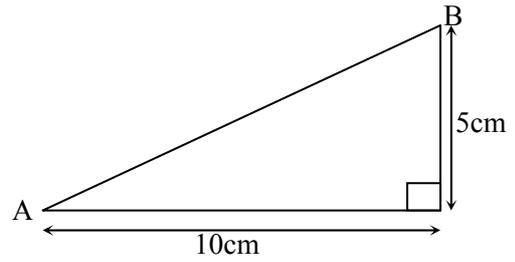

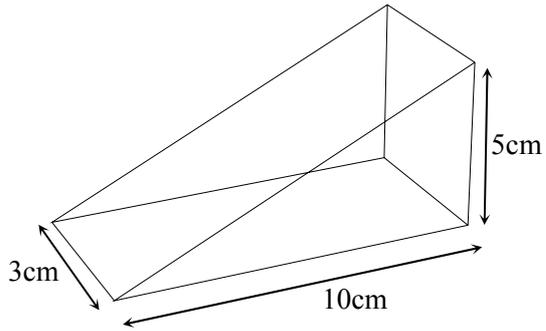

5 marks

- Work out the missing angles **A** and **B**.
- Work out the missing lengths x and y .

6 marks

19. A prism has a height 5cm, a width of 10cm and a depth of 3cm as shown.
One of the faces of the prism is a right-angled triangle as shown.
Calculate the volume of this prism and the length AB giving your answer exactly.

3 marks
