General Certificate of Secondary Education June 2006

MATHEMATICS (SPECIFICATION A) **Higher Tier** Paper 2 Calculator

Monday 12 June 2006 9.00 am to 11.00 am

For this paper you must have:

- a calculator
- · mathematical instruments

Time allowed: 2 hours

Instructions

- Use blue or black ink or ball-point pen. Draw diagrams in pencil.
- Fill in the boxes at the top of this page.
- Answer all questions.
- Answer the questions in the spaces provided.
- Do all rough work in this book.

Information

- The maximum mark for this paper is 100.
- The marks for questions are shown in brackets.
- You may ask for more answer paper, graph paper and tracing paper. They must be tagged securely to this answer booklet.

Advice

• In all calculations, show clearly how you work out your answer.

Formulae Sheet: Higher Tier

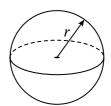

You may need to use the following formulae:

Volume of prism = area of cross-section \times length

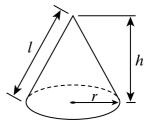

Volume of sphere =
$$\frac{4}{3} \pi r^3$$

Surface area of sphere = $4 \pi r^2$

Volume of cone =
$$\frac{1}{3} \pi r^2 h$$

Curved surface area of cone = $\pi r l$

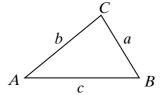

In any triangle ABC

Area of triangle = $\frac{1}{2}ab \sin C$

Sine rule
$$\frac{a}{\sin A} = \frac{b}{\sin B} = \frac{c}{\sin C}$$

Cosine rule $a^2 = b^2 + c^2 - 2bc \cos A$

The Quadratic Equation

The solutions of $ax^2 + bx + c = 0$, where $a \ne 0$, are given by

$$x = \frac{-b \pm \sqrt{(b^2 - 4ac)}}{2a}$$

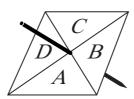

Answer all questions in the spaces provided.

1	Solve the inequality
	5x + 3 > 10
	Answer
2	A form teacher records the number of times her students were late during a term.
	She shows the data for those who were late in a stem and leaf diagram.
	Key 2 6 represents late 26 times
	0 1 1 2 6 1 2 4 4 2 3 6 3 2 4 0 9
	17 students were never late.
	Calculate the mean number of times students were late for the whole form.

3 A four-sided spinner has sections labelled A,B,C,D.

The spinner is spun and the relative frequency of the letter A is recorded after every 10 spins.

(a)	After 50 spins there were 20 letter As.	
	Plot this relative frequency on the diagram.	
		(1 mark)
(1.)		
(b)	The relative frequency after the first 60 spins is 0.45	
	How many times does the spinner land on A in the first 60 spins?	
	Answer	(1 mark)
(c)	Is the spinner biased?	
(0)	Give a reason for your answer.	
	Sive a reason for your answer.

- 7 A race track is made from two straights and two semicircles. The straights are 80 m long.

 The race track has a total perimeter of 400 m.

Not drawn accurately

Calculate the distance, d , between the two straights.		
	•••••••••••••••••••••••••••••••••••••••	••••••
Δ nswer $d =$	m	(4 marks)

8 (a) A calculator displays a number in standard form as

		correct ans					
•••••	••••••	7000	0.700	0.007	700	0.0007	(1 mark)
(b)	Use	your calcul	ator to work out				
			co	$s(tan^{-1}0.45)$			
	(i)	Give all th	he figures in your	calculator displ	ay.		
			Answer				(1 mark)
	(ii)	Write you	r answer to an ap	propriate degree	of accuracy.		
			Answer				(1 mark)
(c)	Use	your calcul	ator to work out				
			(3.45×1)	$\frac{10^4) \times (4.9 \times 10^{-1})}{(2.1 \times 10^5)}$			
			Answer				(1 mark)

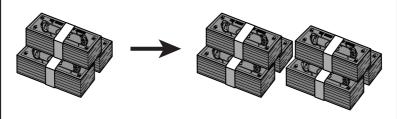

9 John has £2000 to invest. He sees this advert.

SureFire Investments

Don't see your money go up in smoke!

Double your money in 10 years!

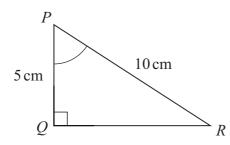

The average annual growth of our investment account is 7.2%

Will John double his money in ten years with SureFire Investments? You must show your working.
(4 marks)

(a)	Solve the equation
	4(x+3) = 9(x-2)
	Answer $x = \dots$ (3 mark)
(b)	Solve these simultaneous equations
(0)	
	5x + 3y = 6 $3x - 7y = 19$
	You must show your working. Do not use trial and improvement.
	Answer $x =, y =$

11	(a)	Find the values of a and b such that
		$x^2 + 8x - 5 \equiv (x+a)^2 + b$
		Answer $a = \dots b = \dots (2 \text{ marks})$
	(b)	Hence, or otherwise, solve the equation
		$x^2 + 8x - 5 = 0$
		Give your answers to 2 decimal places.
		Answer

12 (a) PQR is a right-angled triangle. PR = 10 cm and PQ = 5 cm

Not drawn accurately

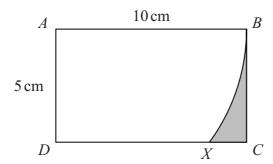

(i)	Calculate the length QR .
	Answer
(ii)	Calculate the size of angle <i>QPR</i> .
(ii)	Calculate the size of angle <i>QPR</i> .
(ii)	Calculate the size of angle <i>QPR</i> .
(ii)	Calculate the size of angle <i>QPR</i> .
(ii)	Calculate the size of angle <i>QPR</i> .
(ii)	

(b) ABCD is a rectangle.

 $AB = 10 \,\mathrm{cm}$ and $AD = 5 \,\mathrm{cm}$.

An arc of a circle of radius 10 cm is drawn with centre A.

The arc starts at B and meets the side CD at X.

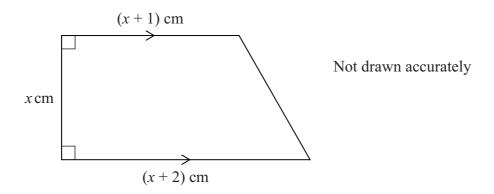

Not drawn accurately

Using your answers to part (a), or otherwise, calculate the shaded area.

Answer	s)

(5 marks)

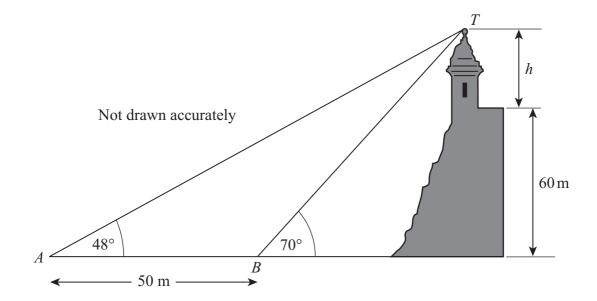

13 A trapezium has parallel sides of length (x + 1) cm and (x + 2) cm. The perpendicular distance between the parallel sides is x cm. The area of the trapezium is 10 cm^2 .

and the value of x .	

Answer $x = \dots$ cm

Zoe wants to find the height of a tower on top of a cliff.
From point A she measures the angle of elevation of the top of the tower, T, as 48°.
She then walks 50 metres horizontally towards the tower to a point B, where the angle of elevation of T is 70°.
The height of the cliff is 60 metres.

Calculate the height, h , of the tower.
Answer $h = \dots m$ (6 marks)

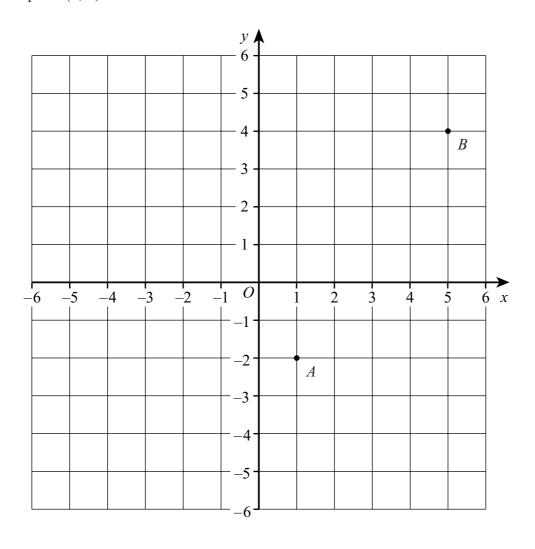

15	(a)	Factorise	$5x^2 + 20x$	
			Answer	(1 mark)
	(b)	Factorise	$x^2 - 49$	
			Answer	(1 mark)
	(c)	Factorise fully	$(3x+4)^2 - (2x+1)^2$	
			Answer	(3 marks)

16	Rearrange	ı, –	xy + 2
10	Realitange	у —	3x - 4

to make x the subject.
Simplify your answer as much as possible.
Answer

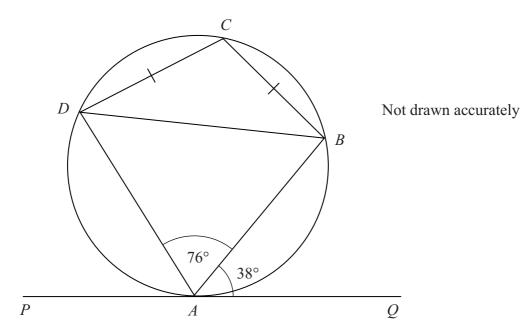

Turn over for the next question

17 *A* is the point (1, -2). *B* is the point (5, 4).

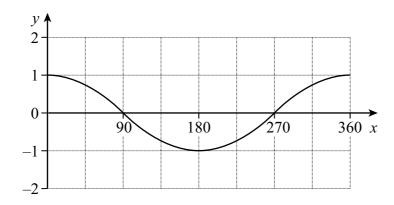

Find the equation of the line perpendicular to AB , passing through the mid-point of AB .
Answer

18 ABCD is a cyclic quadrilateral. PAQ is a tangent to the circle at A. BC = CD Angle $QAB = 38^{\circ}$ and angle $BAD = 76^{\circ}$

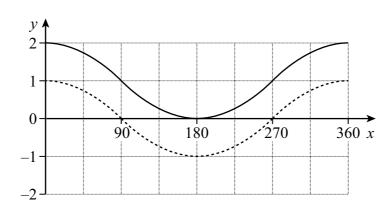

Show that AD is parallel to BC .
Give reasons to justify any values you write down or calculate.
(4 marks)
(' ''''

19 This is the graph of $y = \cos x$ for $0^{\circ} \le x \le 360^{\circ}$

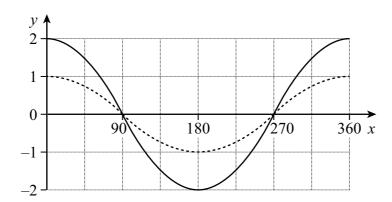

Write the equation of each of the transformed graphs. In each case the graph of $y = \cos x$ is shown dotted to help you.

(a)

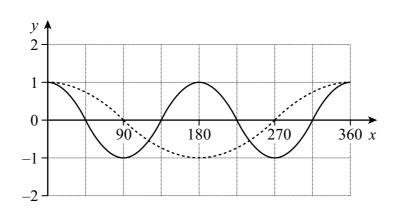

Equation $y = \dots (1 \text{ mark})$

(b)

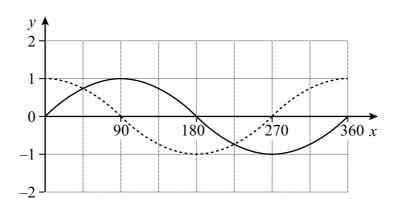

Equation $y = \dots$ (1 mark)

(c)

Equation $y = \dots$ (1 mark)

(d)

Equation $y = \dots$ (1 mark)

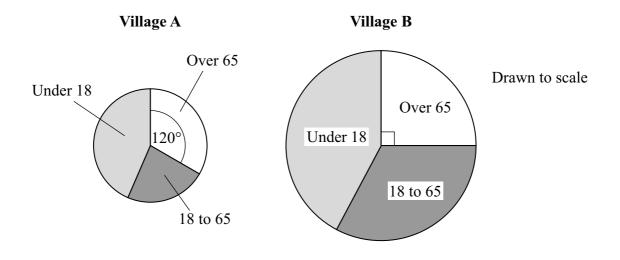

20 A floodlight tower is marked with the following sign.

WATTAGE NOT TO EXCEED 400 000 WATTS

The spotlights on the tower are rated at 2500 watts each. The manufacturer can only guarantee that the wattage of these spotlights is accurate to the nearest 100 watts.

(a)	What is the maximum number of spotlights that can safely be put on the tower?
	Answer
(b)	The formula $W = I^2 R$
	connects W (watts), I (amps) and R (ohms).
	For one of the spotlights, the value of I is 25 amps measured to 2 significant figures.
	What is the minimum possible value of R ?
	Answer ohms (3 marks)

21 The pie charts show the age distribution in two villages A and B. The population of the villages is proportional to the **area** of the pie charts. There are 660 people over 65 in village A.

How many people are over 65 in village B? Show clearly any measurements or assumptions that you make. Show your method clearly.
Answer (5 marks)
