Instructions to Candidates

In the boxes above, write your centre number, candidate number, your surname, initial(s) and signature. Check that you have the correct question paper.

Some questions must be answered with a cross in a box (\boxtimes) .

If you change your mind about an answer, put a line through the box (X) and then mark your new answer with a cross (\mathbf{X}) .

Answer ALL the questions. Write your answers in the spaces provided in this question paper. Do not use pencil. Use blue or black ink.

Information for Candidates

The marks for individual questions and the parts of questions are shown in round brackets: e.g. (2). There are 4 questions in this question paper. The total mark for this paper is 100. There are 20 pages in this question paper. Any blank pages are indicated. Calculators may be used.

Advice to Candidates

Write your answers neatly and in good English.

You are advised to spend the same amount of time on each of the 4 questions.

Answer ALL the questions.

Question 1

Italians consume more pasta than any other nation. Figure 1a shows the change in the average amount of pasta consumed by each person in Italy from 2007 to 2008.

Figure 1a

(a) (i)	With reference to the data in Figure 1a, describe the change in the relationship between the price of pasta and the quantity demanded from 2007 to 2008.
	(2)

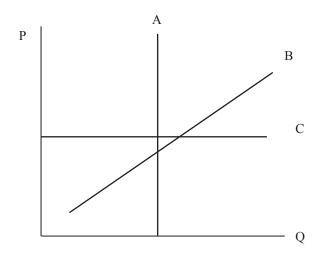

(ii)	The demand for pasta is price inelastic. With reference to the total amount spent on pasta in 2007–2008 explain this statement.
	(4)

Leave	
hlank	

(b) (i)	Pasta is made from wheat which is an agricultural commodity. Explain how two factors may affect the supply of wheat. Which of these factors is the most important? Give reasons for your answer.
	(5)

Figure 1b

The supply of wheat in 2007

(ii) In 2007 the price elasticity of supply of wheat = 0.

Which of the curves, A, B or C, shown on Figure 1b shows the supply of wheat in 2007?

Answer =	
	(1)

(iii) Explain your answer.

(2)

(c) The following table, Figure 1c, shows the demand for pasta as incomes change for two different income groups, Group A and Group B.

Figure 1c

Group A: High income earners

Year	Income (euros)	Quantity demanded (kg)	
2009	40,000	25	
2010	44,000	20	

Group B: Low income earners

Year	Income (euros)	Quantity demanded (kg)
2009	10,000	30
2010	11,000	32

	··\	1.	1 .				10
(1) For whi	ch incom	e group is	pasta an	interior	good?

Group

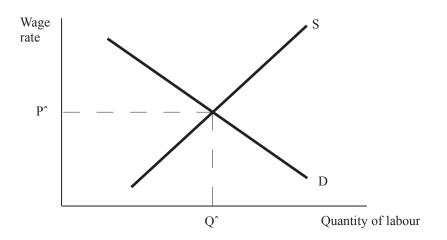

(1)

(ii) Use the data in Figure 1c to explain your answer.

(3)

(d) (i) On Figure 1d show the effect of the introduction of a minimum wage rate on the price and quantity of labour.

Question 2

Paul Chung owns a shop which prints digital photos for its customers. Paul has taken a loan from the bank to purchase a printer and employs a student, Sam, to work in his shop at weekends.

	(1
Paul's co	sts are shown below
Electricit	<u>e</u>
Paper Rent	Loan repayment Ink cartridges for printer
(ii) With	the aid of one example from the list above, define variable costs.
	(2
/**`\ F	·
(111) From	the list above give one example of fixed costs.
	(1
	will happen to fixed costs if Paul increases production from 20,000 to 00 prints each week?
\boxtimes	Rise
\times	Fall
\boxtimes	Stay the same
	(1
Paul print (100 cent	is 20,000 photos for his customers each week. He charges 10 cents per print $s = \$1$)
	ulate his total revenue for a week. Show your workings.
(v) Calc	
(v) Calc	

Leave blank

	(vi)	Paul's variable costs for 20,000 prints are \$500. His fixed costs are \$600 a week.
		Calculate his total costs.
		(1)
	(vii	Calculate Paul's weekly profit when he produces and sells 20,000 photos.
		(1)
(b)		toPlus, a business with many print shops in different towns, benefits from economies cale.
	(i)	With the aid of one example define 'economies of scale'.
		(3)

(ii)	PhotoPlus wants to purchase Paul's business. To what extent would this be in the interests of the consumers?
	(5)
i)	PhotoPlus is in the private sector of the economy. Distinguish between the private and public sectors of an economy in terms of ownership.
