_____ sunny day,

_____ get between,

You see them shining far away.

V. Comprehension.

(1)

Read the following passage carefully and answer the questions below.

The tiger is the largest of all cats. It is the most fearsome predators in the world. A typical male Siberian tiger may weigh 500 pounds. The tiger's gold colouring with black stripes allows it to hide easily in its environment. Tiger can travel long distances.

Tigers eat just about anything, but nothing eats the tiger. They have been known to eat crocodiles, fish, birds, reptiles, and even predators like leopards and bears. However, its favourite food is animals such as deer and wild pigs.

People have hunted tigers for hundreds of years. Humans are the biggest threat to the tiger population of this world. Only 5,100 to 7,500 tigers now remain in the entire world.

Q.1 How much does a typical male Siberian tiger weigh?

Q.2 Write two adjectives which describes the tiger?

Q.3 What is the tiger's favourite food?

Q.4 Who is the threat to the tiger population?

Q.5 How many tigers now remain in the entire world?
