## QUESTION 2

24 marks

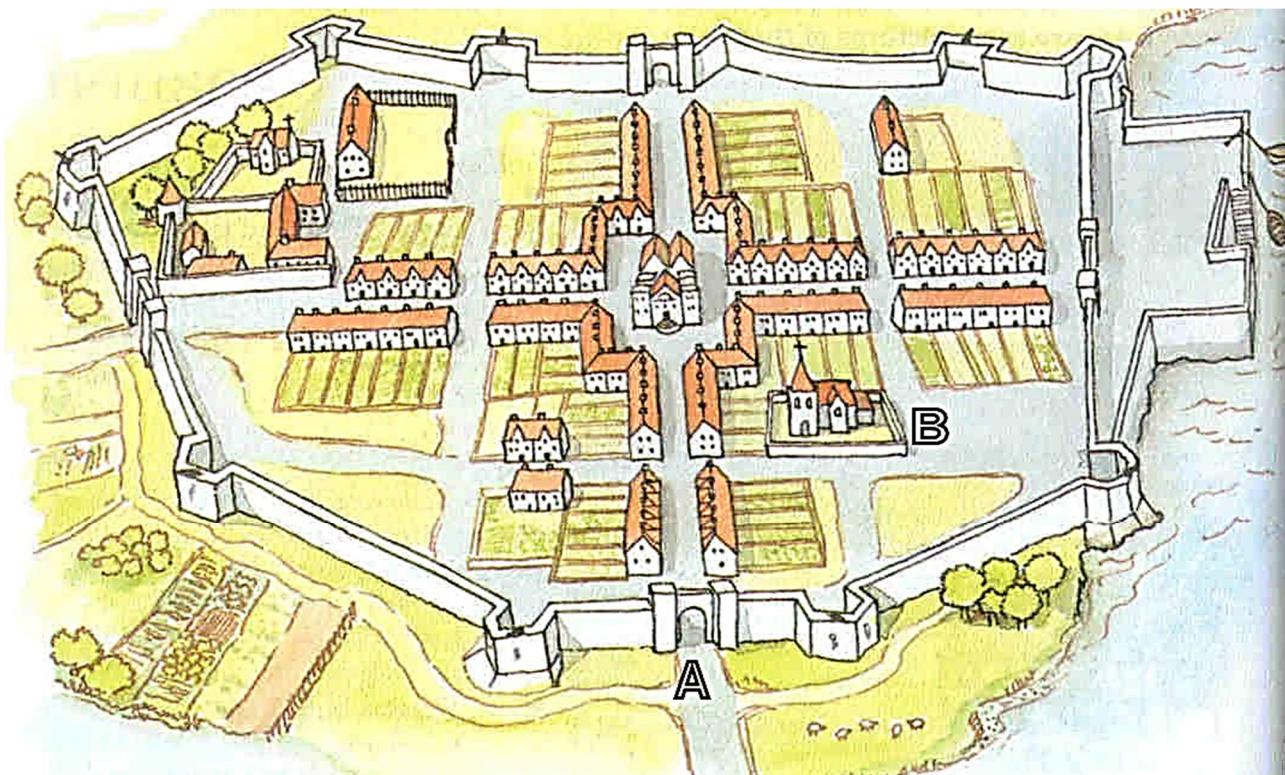

Answer part (A) or (B)

(A) PLANTATION IN 17<sup>th</sup>-CENTURY IRELAND

(24 marks)

Look at the following sources and answer the questions which follow:

Large plantation towns in Ireland were built to a special design. They all had walls around them and a central area usually called the diamond, though it was not always diamond-shaped. This drawing shows a plan for a town.

1. The letter A shows a gate.

On the picture above, using the letter A, mark **TWO** other gates into this town.

(2)

2. What type of building is marked by the letter B?

\_\_\_\_\_ (2)

3. Circle the correct answer.

The central area in this town is shaped like a:

circle      triangle      rectangle.

(2)

4. Apart from the wall, give **ONE** reason why this town would be difficult to attack.

\_\_\_\_\_ (2)

5. Name **TWO** plantation towns in Ulster.

\_\_\_\_\_ (2)

Derry was the biggest town in the Ulster plantation. It had been originally chosen because, '*It had a very good harbour*'.

King James hoped that it would become a great port, trading with London and other places. He planned it should have great high walls around it and 400 planter families living there.

*In 1619, the King wanted to know what was happening in Derry, so he sent Nicholas Pynnar to find out and write a report for him. This is part of Nicholas Pynnar's report:*

The City of London-Derry is now surrounded about by a very strong wall.

It is 24 feet high and six feet thick

It is built of stone

There are four gates, each 21 feet wide

Two have drawbridges

Two have portcullises

There are nine bulwarks, large enough for cannon.

The number of families living within the city is 102. This is far too few to defend the walls.

6. Give **TWO** facts from Nicholas Pynnar's report that would have made the king happy.

---

---

(2)

7. How many families were expected to come to Derry and how many had arrived by 1619?

---

---

(2)

8. Give **TWO** pieces of evidence that defence was important for plantation towns like Derry.

**(B) BRAZIL**

**(24 marks)**

**Look at the information and photographs below and answer the questions on the next page.**

Maria lives with her grandparents, parents and three daughters in northern Brazil. Her husband now lives in Escondidinho, a favela near to the city centre in Rio de Janeiro.

Maria's husband moved to Rio to look for more reliable work. He sends the extra money he earns home to Maria and his children. Life in Rio is not easy. Living conditions in the favelas are poor. Many Brazilian favelas are illegal and inhabitants face the risk of eviction.

Maria left school early to help on her family's small farm and so has had very little education and has little training. She would receive higher wages if she moved to Rio and could get a job. There is no guarantee she would be able to find a job. She enjoys the peace and quiet of the open countryside. She does not know whether she would like the hustle and bustle of city life.

The government of Brazil has started to offer the people living in the favelas the opportunity to improve their own living conditions. They are providing land where water, sewage and electricity are already available in the city of Rio.

The local vegetation of the north-east is unattractive, mainly consisting of scrub and thorn bushes. Drought and unreliable rainfall are common in north-east Brazil. Farming is very difficult in some of the dry parts of north-eastern Brazil.

Rio de Janeiro has some really rich people living in it and also some really poor people.

1. Where does Maria's husband live?

---

(2)

2. Why did Maria's husband move away from his family?

Answer part (A), then answer part (B) or (C)

(A) THE INDUSTRIAL REVOLUTION

(12 marks)

Look at the pictures and information below and answer the questions on the next page.

The factories are in the centre of the town. They are large, filthy buildings topped by tall chimney stacks which pour out smoke and soot into the air. Clustered around the factories one may see row after row of houses cramped together and all looking the same. Their walls are dirty and many of the windows are broken.

Narrow lanes, or courts, separate the rows of houses from one another. These lanes are littered with foul-smelling rubbish. Most families live in one room, or in cold, damp cellars.

The children are filthy and many beg openly on the streets.

1. Why was the air in the towns in the Industrial Revolution so dirty?

---

---

(2)

2. Why were the houses in the cities built so close together?

---

---

(2)

3. Looking at the photographs, what evidence is there that the children were poor?

---

---

(2)

4. Give **ONE** reason why disease spread so easily in the cities of the Industrial Revolution.

## QUESTION 4

24 marks

Answer parts (A) and (B)

### A. TRAFFIC CONGESTION IN IRISH TOWNS

(12 marks)

Traffic and parking has become a problem in many towns in Ireland. Look at the photographs below and answer the questions which follow.

1. Describe **TWO** ways in which traffic congestion can affect businesses in a town.

---

---

---

---

---

(4)

2. A bypass is a road or motorway that goes around a town or village so that traffic which is passing that town does not have to go through the town centre. Bypasses can help with traffic problems in a town.

This map shows the bypass road in Naas, Co. Kildare. The old road through the town is shown on the map in green and the new bypass road going around the town is shown in pink.

(a) Give **ONE** advantage of a bypass road for the people who live in the town.

---

---

(2)

(b) Give **ONE** disadvantage of a bypass road for the people who live in the town.

---

---

(2)

3. On the map of Naas above, you can see there is a business park on the bypass outside the town.

Do you think the business park will help or damage businesses in the town? Explain your answer.

**B. LOW-COST IRRIGATION IN THE DEVELOPING WORLD****(12 marks)**

Look at the photographs below and answer the questions which follow.

Water can be scarce in some poorer countries. These photographs show low-cost irrigation systems which allow people to make sure every drop of water gets to their plants. The tank of water is put on a stand slightly higher than the plants and the water drips down through hoses to water the plants. This means the system does not need a pump to work.

1. Name **ONE** material used to build these irrigation systems \_\_\_\_\_ (2)
2. These systems do not need pumps to work. Give **TWO** reasons why this is good for farmers.
  - a. \_\_\_\_\_
  - b. \_\_\_\_\_ (2)
3. These irrigation systems are very popular with women farmers. Give **TWO** reasons why you think these systems would be popular with people who have very little land or money.
  - a. \_\_\_\_\_
  - b. \_\_\_\_\_ (2)

When the crops are grown, the farmers can sell them at market to make money and perhaps buy more equipment or an animal such as a goat or some chickens.

Give **TWO** ways in which buying a goat or some chickens could help improve the lives of the farmers.
