Marking Scheme

MATERIALS AND TECHNOLOGY
METALWORK

Ordinary Level

Note to teachers and students on the use of published marking schemes

Marking schemes published by the State Examinations Commission are not intended to be standalone documents. They are an essential resource for examiners who receive training in the correct interpretation and application of the scheme. This training involves, among other things, marking samples of student work and discussing the marks awarded, so as to clarify the correct application of the scheme. The work of examiners is subsequently monitored by Advising Examiners to ensure consistent and accurate application of the marking scheme. This process is overseen by the Chief Examiner, usually assisted by a Chief Advising Examiner. The Chief Examiner is the final authority regarding whether or not the marking scheme has been correctly applied to any piece of candidate work.

Marking schemes are working documents. While a draft marking scheme is prepared in advance of the examination, the scheme is not finalised until examiners have applied it to candidates' work and the feedback from all examiners has been collated and considered in light of the full range of responses of candidates, the overall level of difficulty of the examination and the need to maintain consistency in standards from year to year. This published document contains the finalised scheme, as it was applied to all candidates' work.

In the case of marking schemes that include model solutions or answers, it should be noted that these are not intended to be exhaustive. Variations and alternatives may also be acceptable. Examiners must consider all answers on their merits, and will have consulted with their Advising Examiners when in doubt.

Future Marking Schemes

Assumptions about future marking schemes on the basis of past schemes should be avoided. While the underlying assessment principles remain the same, the details of the marking of a particular type of question may change in the context of the contribution of that question to the overall examination in a given year. The Chief Examiner in any given year has the responsibility to determine how best to ensure the fair and accurate assessment of candidates' work and to ensure consistency in the standard of the assessment from year to year. Accordingly, aspects of the structure, detail and application of the marking scheme for a particular examination are subject to change from one year to the next without notice.

MATERIALS AND TECHNOLOGY ***METALWORK***

ORDINARY LEVEL

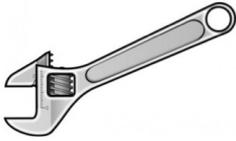

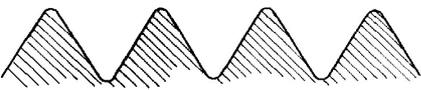

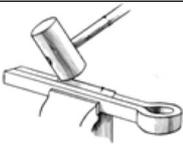

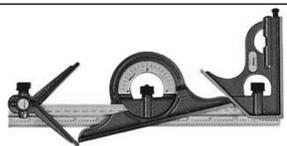

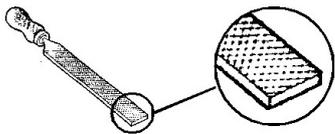

MARKING SCHEME **Written Examination and Project**

Note: For the written examination - Answer Question 1, Sections A and B and any three other questions - Total: 100 Marks.
The solutions presented are examples only.
All other valid solutions are acceptable and are marked accordingly.

Question 1.

SECTION A - 20 MARKS
ANSWER ANY TEN QUESTIONS FROM THIS SECTION

40 Marks

| | | | | | | | | | | | | |
|--------------------|---|------------------------------|---|-------------------|---|--------------------|---|------------------|---|-------------------|---|----------|
| (a) |  | This tool is a(n): | <table border="1" style="width: 100%; border-collapse: collapse;"> <tr><td>Ring Spanner</td><td style="width: 20px;"></td></tr> <tr><td>Adjustable Spanner</td><td style="text-align: center;">✓</td></tr> <tr><td>Box Spanner</td><td></td></tr> <tr><td>Adjustable Wrench</td><td></td></tr> </table> | Ring Spanner | | Adjustable Spanner | ✓ | Box Spanner | | Adjustable Wrench | | 2 |
| Ring Spanner | | | | | | | | | | | | |

SECTION B - 20 MARKS
ANSWER ALL QUESTIONS FROM THIS SECTION

(m)

(i) List **three** materials used in the manufacture of a smartphone.

| | |
|----|------------------|
| 1. | <i>Aluminium</i> |
| 2. | <i>Glass</i> |
| 3. | <i>Plastic</i> |

4

(ii) List **three** features of a smartphone.

| | |
|----|------------------------|
| 1. | <i>Touch screen</i> |
| 2. | <i>Internet access</i> |
| 3. | <i>Camera</i> |

4

(n) Briefly describe how the use of computers has improved our lives.

| |
|---|
| <i>Shopping from home</i> |
| <i>Easy access to information</i> |
| <i>Improved ways of designing and manufacturing</i> |
| <i>Improved world-wide communications</i> |

4

(o) (i) Home computers use electricity supplied at:

| | |
|-----------|---|
| 50 Volts | |
| 75 Volts | |
| 100 Volts | |
| 220 Volts | ✓ |

(ii) This mouse is a(n):

| | |
|-----------------|---|
| Input Device | ✓ |
| Output Device | |
| Printing Device | |
| Storage Device | |

2

(p) (i) The rating on a light bulb is in:

| | |
|---------|---|
| Watts | ✓ |
| Voltage | |
| Ohms | |
| Amps | |

(ii) The filament in a bulb is made from:

| | |
|----------|---|
| Steel | |
| Tungsten | ✓ |
| Copper | |
| Aluminum | |

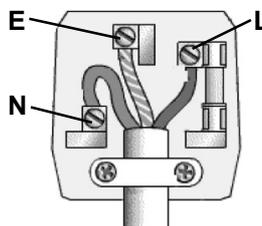

2

(q) (i) The current supplied by a phone battery is called:

| | |
|---------------------|---|
| Direct Current | ✓ |
| Alternating Current | |
| Electrical Energy | |

(ii) Name each terminal in the plug shown:

| | |
|---|---------|
| L | Live |
| N | Neutral |
| E | Earth |

4

Question 2.

20 Marks

(a)

(i) Brass is an alloy of:

| | |
|---------------|-------------------------------------|
| Copper & Lead | <input type="checkbox"/> |
| Copper & Zinc | <input checked="" type="checkbox"/> |
| Copper & Tin | <input type="checkbox"/> |

(v) A material is said to be ductile when it can be easily:

| | |
|-----------|-------------------------------------|
| Broken | <input type="checkbox"/> |
| Stretched | <input checked="" type="checkbox"/> |
| Fractured | <input type="checkbox"/> |

(ii) Brass is a(n):

| | |
|-------------------|-------------------------------------|
| Ferrous Metal | <input type="checkbox"/> |
| Non-Ferrous Metal | <input checked="" type="checkbox"/> |
| Alloy | <input type="checkbox"/> |

(vi) The melting of a plastic material onto metal is called:

| | |
|-------------|-------------------------------------|
| Lacquering | <input type="checkbox"/> |
| Dip Coating | <input checked="" type="checkbox"/> |
| Enamelling | <input type="checkbox"/> |

(iii) Lead is a:

| | |
|-----------------|-------------------------------------|
| Malleable Metal | <input checked="" type="checkbox"/> |
| Strong Metal | <input type="checkbox"/> |
| Brittle Metal | <input type="checkbox"/> |

(vii) The ability of a material to resist wear is called:

| | |
|------------|-------------------------------------|
| Ductility | <input type="checkbox"/> |
| Elasticity | <input type="checkbox"/> |
| Hardness | <input checked="" type="checkbox"/> |

(iv) Electrical wire is normally made from:

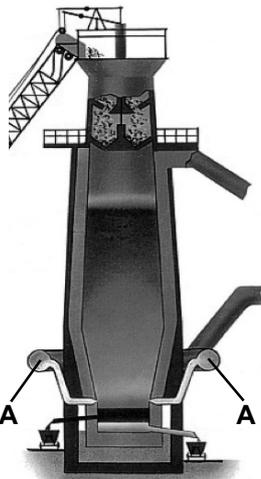

| | |
|--------|-------------------------------------|
| Zinc | <input type="checkbox"/> |
| Lead | <input type="checkbox"/> |
| Copper | <input checked="" type="checkbox"/> |

(viii) Gears are normally made from:

| | |
|---------|-------------------------------------|
| PVC | <input type="checkbox"/> |
| Nylon | <input checked="" type="checkbox"/> |
| Acrylic | <input type="checkbox"/> |

8

(b) Complete the table:

| | | |
|--|-----|-------------------------------------|
| (i) This sketch shows a Blast Furnace. | Yes | <input checked="" type="checkbox"/> |
| | No | <input type="checkbox"/> |
| (ii) This furnace is used to produce steel. | Yes | <input type="checkbox"/> |
| | No | <input checked="" type="checkbox"/> |
| (iii) The required heat is generated by an electric arc. | Yes | <input type="checkbox"/> |
| | No | <input checked="" type="checkbox"/> |
| (iv) Iron ore is smelted in this furnace. | Yes | <input checked="" type="checkbox"/> |
| | No | <input type="checkbox"/> |
| (v) The nozzles, labelled A, are called tuyeres. | Yes | <input type="checkbox"/> |
| | No | <input checked="" type="checkbox"/> |
| (vi) This furnace can be rotated to various positions. | Yes | <input type="checkbox"/> |
| | No | <input checked="" type="checkbox"/> |

6

(c) Complete the chart by listing a tool for each task.

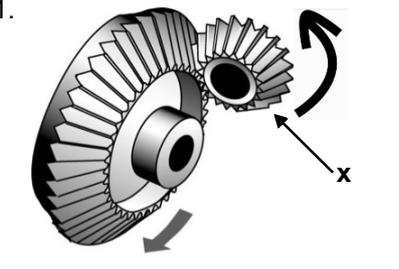

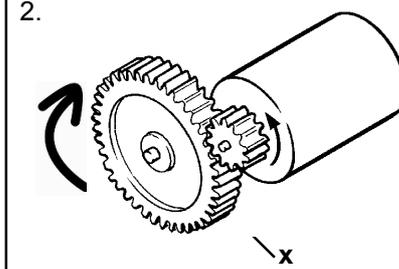

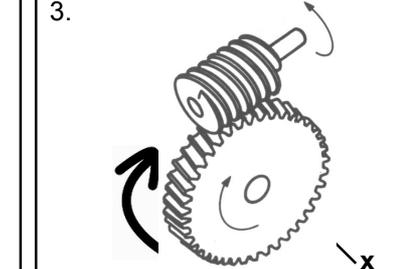

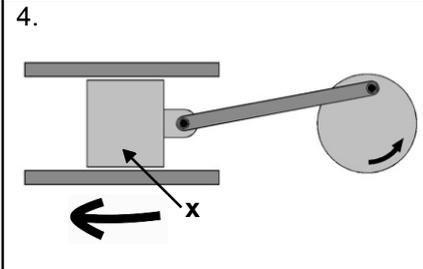

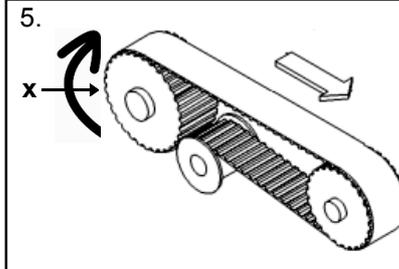

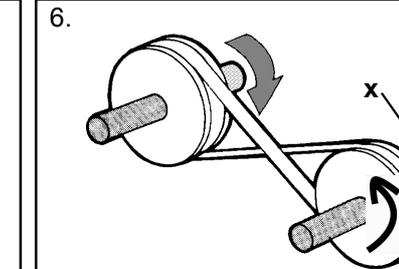

| Task | Tool |
|--|-------------------------------|
| To draw a circle on a piece of metal. | Dividers |
| To fold a small piece of thin sheet metal. | <i>Folding bars</i> |
| To cut thin sheet metal. | <i>Tin snips</i> |
| To join two pieces of thin sheet metal. | <i>Pop riveting hand tool</i> |
| To cut an internal thread. | <i>Tap</i> |
| To mark the position of a hole centre. | <i>Centre punch</i> |
| To measure the depth of a hole. | <i>Depth gauge</i> |

6

Question 3.

20 Marks

(a) (i) Indicate with an arrow the direction of movement of part **X** in each of the following.

| | | |
|---|---|--|
| 1.  | 2.  | 3.  |
| 4.  | 5.  | 6.  |

(ii) Which one of these mechanisms is a worm and wormwheel?

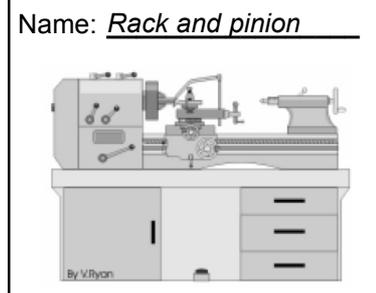

Number: 3

(b) (i) Name a mechanism used by each of these machines.

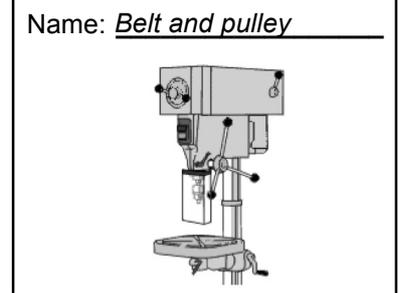

Name: Gears

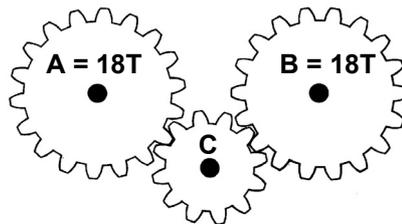

Name: Rack and pinion

Name: Belt and pulley

(ii) If gear **A** rotates at 200 RPM how fast will gear **B** rotate?

| | |
|---------|---|
| 100 RPM | |
| 180 RPM | |
| 200 RPM | ✓ |
| 360 RPM | |

(iii) What is gear **C** called?

Idler gear

(c) (i) The motion in a moving clock pendulum is:

| | |
|-------------|---|
| Rotary | |
| Oscillating | ✓ |
| Linear | |

(ii) Guitar strings are normally in:

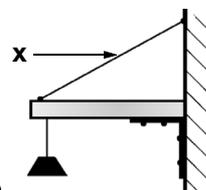

| | |
|-------------|---|
| Tension | ✓ |
| Compression | |
| Torsion | |

(iii) Part **X** is the:

| | |
|---------|---|
| Fulcrum | ✓ |
| Lever | |
| Link | |

(iv) Part **X** is a:

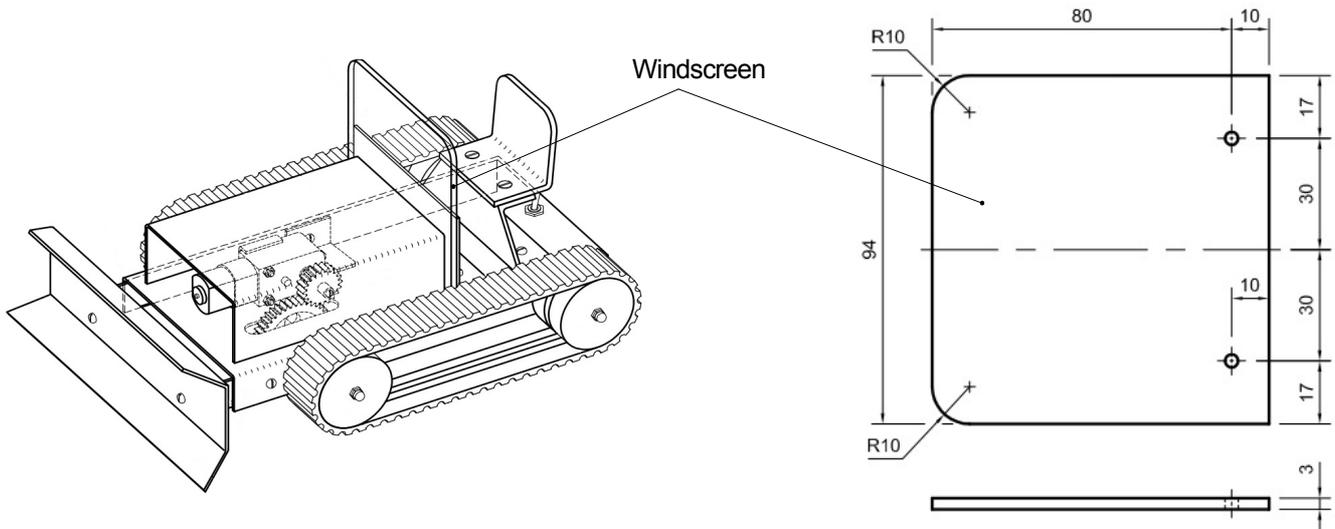

| | |
|-------|---|
| Strut | |
| Tie | ✓ |
| Lever | |

Question 4.

20 Marks

Details of a windscreen used in the manufacture of a model bulldozer are shown.

(i) List the tools and processes used to make the windscreen.

| | |
|-------------------------------|-------------------------------|
| Tools: <i>Spring dividers</i> | Processes: <i>Marking out</i> |
| <i>File</i> | <i>Filing</i> |
| <i>Drilling machine</i> | <i>Drilling</i> |
| <i>Try square</i> | |

4

(ii) In the drawing what does R10 mean?

Radius 10mm

2

(iii) What is the overall length and width of the windscreen?

Length: *94mm*
Width: *90mm*

2

(iv) Describe how you would get a smooth finish on the edge of the windscreen.

Draw filing
Emery cloth
Wet and dry paper

4

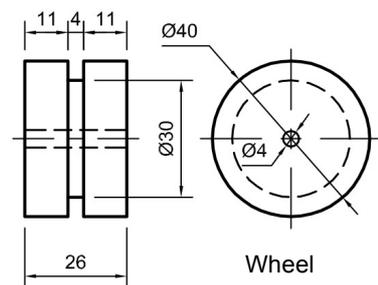

(v) What safety precautions should be observed when drilling acrylic?

Support the workpiece
Secure the work properly
Choose the correct drill speed
Wear safety glasses

4

(vi) Describe how you would make the wheel shown opposite.

Face off
Centre drill
Drill
Cut groove using parting off tool
Part off

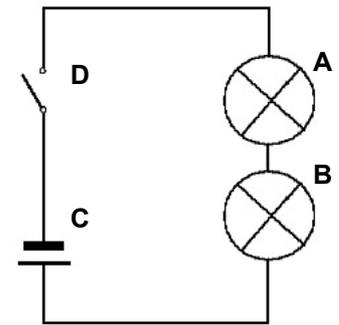

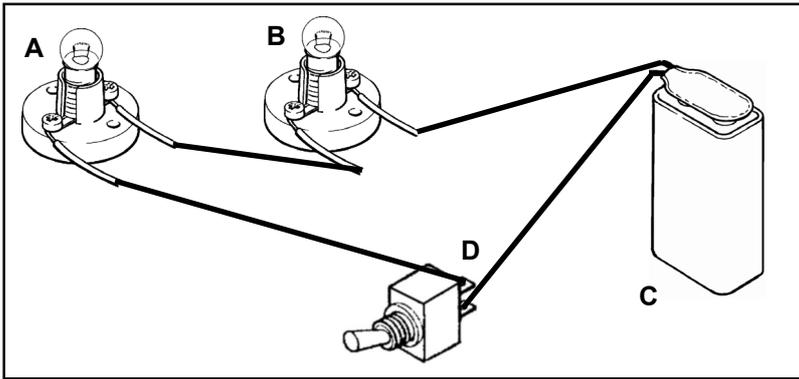

4

Question 5.

20 Marks

(a) (i) Using the circuit diagram as a reference, draw the connecting wires between the components **A**, **B**, **C** and **D** in the box below.

Circuit Diagram

5

(ii) Is this component an LED?

| | |
|-----|-------------------------------------|
| Yes | <input checked="" type="checkbox"/> |
|-----|-------------------------------------|

| | |
|----|--------------------------|
| No | <input type="checkbox"/> |
|----|--------------------------|

(iii) Is this component an integrated circuit?

| | |
|-----|-------------------------------------|
| Yes | <input checked="" type="checkbox"/> |
|-----|-------------------------------------|

| | |
|----|--------------------------|
| No | <input type="checkbox"/> |
|----|--------------------------|

3

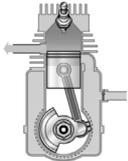

(iv) Is this component a transistor?

| | |
|-----|--------------------------|
| Yes | <input type="checkbox"/> |
|-----|--------------------------|

| | |
|----|-------------------------------------|
| No | <input checked="" type="checkbox"/> |
|----|-------------------------------------|

(b) (i) A car engine converts chemical energy to:

| | |
|-------------------------|-------------------------------------|
| Kenetic and Heat Energy | <input checked="" type="checkbox"/> |
| Light Energy | <input type="checkbox"/> |
| Heat Energy | <input type="checkbox"/> |

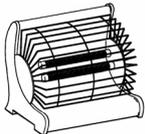

(iv) This symbol represents a(n):

| | |
|-------|-------------------------------------|
| Motor | <input checked="" type="checkbox"/> |
| LDR | <input type="checkbox"/> |
| Fuse | <input type="checkbox"/> |

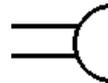

6

(ii) An heater converts electrical energy to:

| | |
|-----------------------|-------------------------------------|
| Kenetic Energy | <input type="checkbox"/> |
| Heat and Light Energy | <input checked="" type="checkbox"/> |
| Sound Energy | <input type="checkbox"/> |

(v) This symbol represents a:

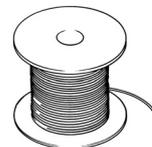

| | |
|---------|-------------------------------------|
| Battery | <input type="checkbox"/> |
| Switch | <input type="checkbox"/> |
| Buzzer | <input checked="" type="checkbox"/> |

(iii) A solar powered calculator converts light energy to:

| | |
|-------------------|-------------------------------------|
| Kenetic Energy | <input type="checkbox"/> |
| Heat Energy | <input type="checkbox"/> |
| Electrical Energy | <input checked="" type="checkbox"/> |

(vi) Electrical solder has a core of:

| | |
|--------|-------------------------------------|
| Copper | <input type="checkbox"/> |
| Lead | <input type="checkbox"/> |
| Flux | <input checked="" type="checkbox"/> |

(c) Name any **two** inventors associated with engineering and state what they invented.

Inventor 1

| | |
|------------------------------|-----------------------------------|
| Name: <i>Robert Stirling</i> | Invention: <i>Stirling engine</i> |
| | |

Inventor 2

| | |
|------------------------------|---|
| Name: <i>Igor Sirkorskey</i> | Invention: <i>Single rotor helicopter</i> |
| | |

6

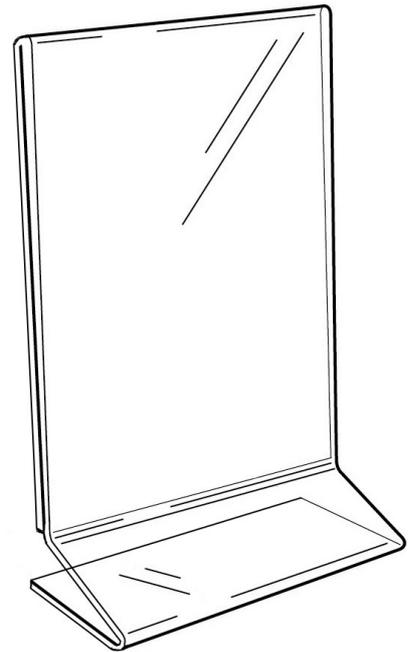

Question 6.

20 Marks

- (i) This design shows a photograph frame made from acrylic sheet. Describe how you would bend the photograph frame to shape.

Using a wire strip heater along the bend lines

shape using a former.

- (ii) What information would you need to know before making a photograph frame?

Size of photograph

- (iii) After manufacture the frame was found to be unstable. How would you improve the design of the frame?

Increase the width of the base

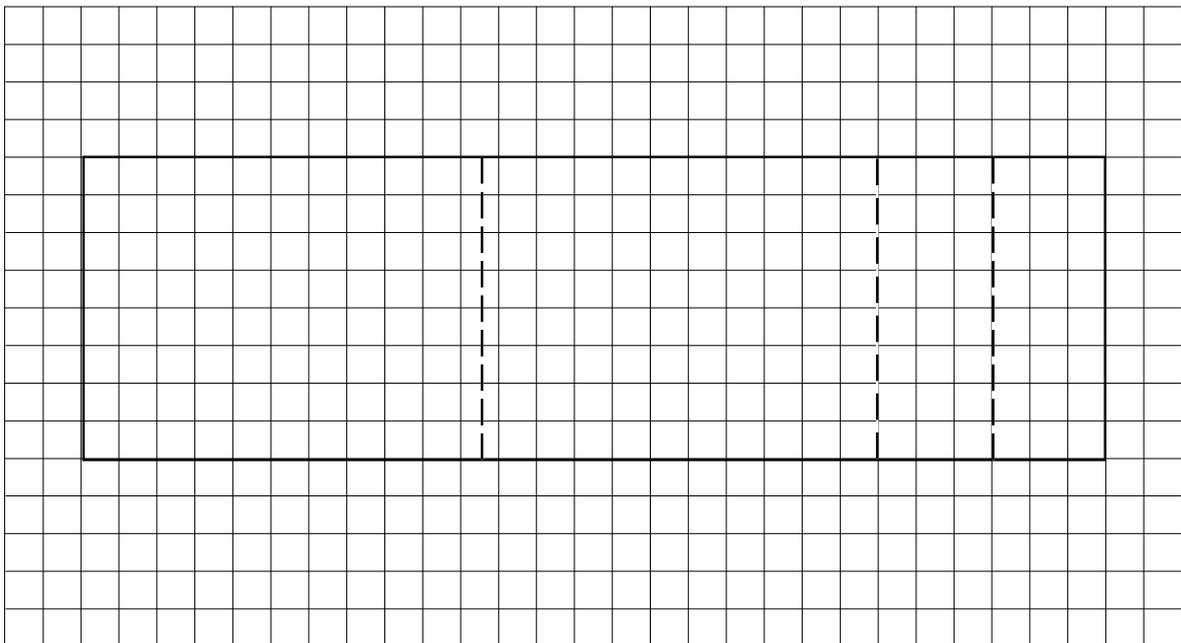

Attach a support to the back

- (iv) What is the difference between a Thermoplastic and a Thermosetting plastic material?

Thermoplastic materials can be reheated and reshaped

Thermosetting plastic materials cannot be reheated or reshaped

- (v) Draw, in the grid below, the acrylic strip before it was bent to form the photograph frame shown above. Show on your drawing the position of the bend lines.

- (vi) Give an example of another project that could be made from acrylic sheet.

Clock face
