### **Note to teachers and students on the use of published marking schemes**

Marking schemes published by the State Examinations Commission are not intended to be standalone documents. They are an essential resource for examiners who receive training in the correct interpretation and application of the scheme. This training involves, among other things, marking samples of student work and discussing the marks awarded, so as to clarify the correct application of the scheme. The work of examiners is subsequently monitored by Advising Examiners to ensure consistent and accurate application of the marking scheme. This process is overseen by the Chief Examiner, usually assisted by a Chief Advising Examiner. The Chief Examiner is the final authority regarding whether or not the marking scheme has been correctly applied to any piece of candidate work.

Marking schemes are working documents. While a draft marking scheme is prepared in advance of the examination, the scheme is not finalised until examiners have applied it to candidates' work and the feedback from all examiners has been collated and considered in light of the full range of responses of candidates, the overall level of difficulty of the examination and the need to maintain consistency in standards from year to year. This published document contains the finalised scheme, as it was applied to all candidates' work.

In the case of marking schemes that include model solutions or answers, it should be noted that these are not intended to be exhaustive. Variations and alternatives may also be acceptable. Examiners must consider all answers on their merits, and will have consulted with their Advising Examiners when in doubt.

### **Future Marking Schemes**

Assumptions about future marking schemes on the basis of past schemes should be avoided. While the underlying assessment principles remain the same, the details of the marking of a particular type of question may change in the context of the contribution of that question to the overall examination in a given year. The Chief Examiner in any given year has the responsibility to determine how best to ensure the fair and accurate assessment of candidates' work and to ensure consistency in the standard of the assessment from year to year. Accordingly, aspects of the structure, detail and application of the marking scheme for a particular examination are subject to change from one year to the next without notice.

## **INFORMATION NOTES**

### **Reasonable accommodations**

Where a candidate has been granted, and availed of, the aid of a scribe, a tape-recorder or a spell-enabled computer, a modified interpretation of this marking scheme may apply.

### **Parentheses ()**

Information contained in parentheses is not required to gain marks.

### **Positive marking**

In all sections of the examination the answers given in the marking scheme should not be considered as the only possible answers that should be accepted. Answers which are synonymous with, or equivalent to, those in the scheme are also acceptable. Examiners will mark positively.

## **NOTES TO EXAMINERS**

- Mark the overall quality of statements/descriptions. Full marks can only be awarded for statements/descriptions that are fully correct.
- Where there is a choice of question to answer, if a candidate answers more than one question, mark all answers and award the marks for the best answer.
- In multiple-choice questions, each extra incorrect answer cancels a correct one.
- In the grand total, round **up** fractions or decimals to the next whole number.
- Leave fractions or decimals in individual answers.
