Instructions

Answers

This means write down your answer or show your working and write down your answer.

Calculators

You **must not** use a calculator to answer any question in this test.

. . . . 1 mark

. . . . 1 mark

1. Fill in the missing numbers.

2. The tables show information about 5 pupils.

This table shows which school clubs they go to.

School Clubs

	Chess	Drama	French	Maths
Ann	X	✓	✓	Х
Mike	X	✓	✓	Х
Paul	X	X	X	✓
Sule	✓	X	✓	✓
Tamsin	Х	✓	Х	Х

This table shows how many pets they have.

Pets

	Cats	Dogs	Mice	Parrots	Snakes
Ann	0	1	0	0	0
Mike	0	0	3	0	2
Paul	2	0	2	2	0
Sule	1	0	0	0	0
Tamsin	1	2	0	2	0

Use the tables to answer these questions.

(a) How many of the pupils go to the French Club?

•

. . . . 1 mark

(b) Which club does Tamsin go to?

1 mark

(c) Who has the greatest number of pets?

1 mark

(d) One pupil said:

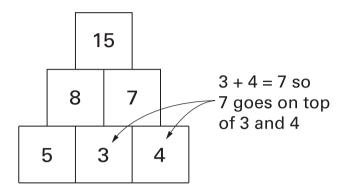

When I was at French Club last night, my cat had kittens.

Who is the only pupil that could have said this?

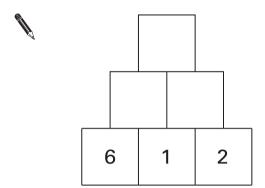

3. This question is about number pyramids.

You add two numbers to work out the number that goes on top of them.

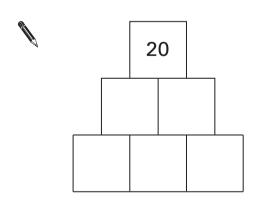

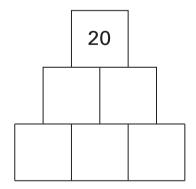

(a) Complete the number pyramid below.

1 mark

(b) Complete the number pyramid below in two different ways.

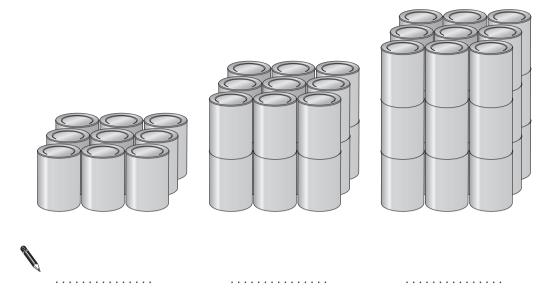

1 mark

4. (a) A shopkeeper stacks tins.

In each layer there are the same number of tins.

How many tins are in each stack below?

(b) The shopkeeper stacks jars in layers.

Each layer looks like this.

How many jars will be in the stack when it is 5 layers high?

1 mark

1 mark

(c) The shopkeeper stacks 30 boxes in layers.In each layer there are 5 boxes.

How many layers high is the stack?

5. (a) Add together 147 and 376

(b) Subtract 36 from 218

(c) Multiply 49 by 3

(d) Divide 160 by 4

6. There are seven different ways to make 8p with coins.

Complete the table to show the seven ways to make 8p. Two have been done for you.

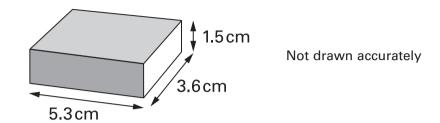

Number of 5p coins	Number of 2p coins	Number of 1p coins
0	0	8
0	1	6

. . . . 1 mark

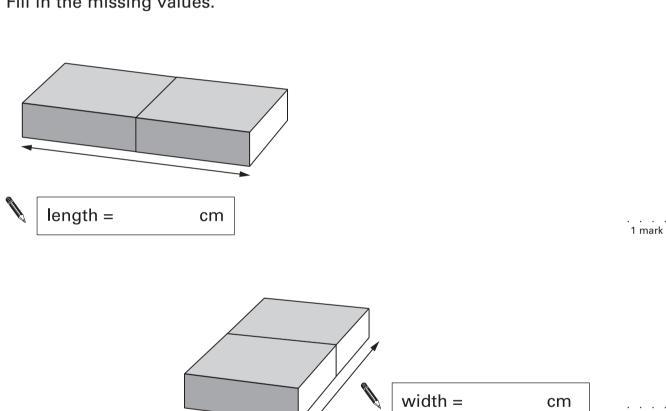

7. The diagram shows a matchbox.

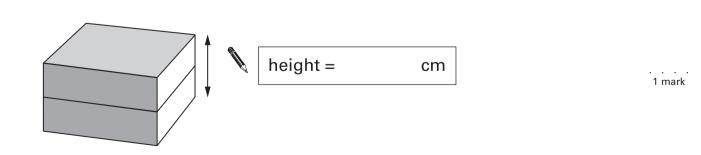

Its length is 5.3cm. Its width is 3.6cm. Its height is 1.5cm.

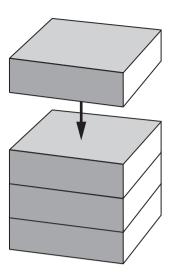

(a) I join **two** matchboxes in different ways.

Fill in the missing values.

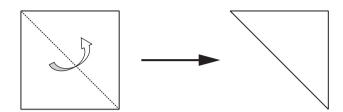

(b) I start joining matchboxes like this:

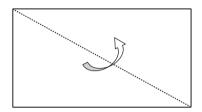

How many matchboxes will be in the pile when its height is 12 cm?

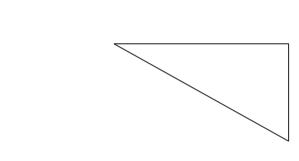

8. When you fold a **square** along a diagonal, you see a triangle.

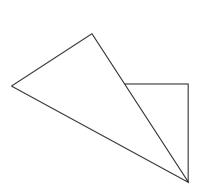

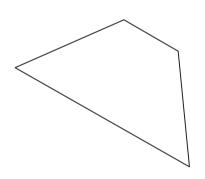

(a) What do you see when you fold a rectangle along a diagonal?

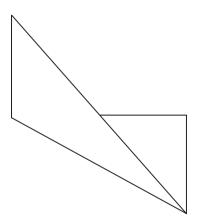

Ring the correct answer below.

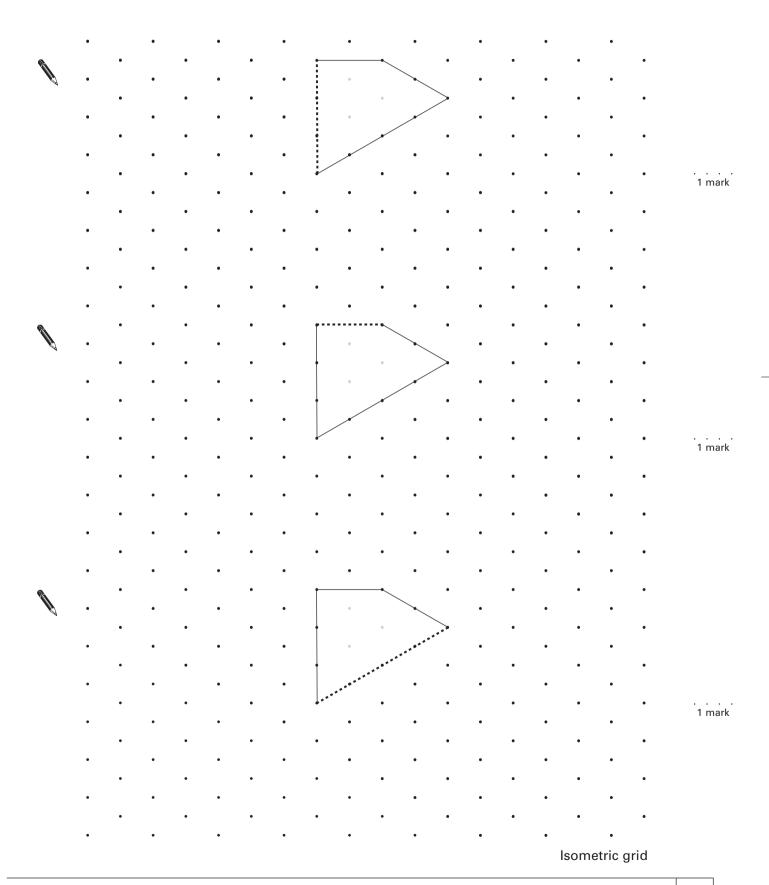

. . . . 1 mark (b) Three different shapes are folded along a line of symmetry.

For each shape, the **dashed line** is the **fold line**.

For each shape, draw what the shape looked like **before** it was folded.

KS3/04/Ma/Tier 3-5/P1

9. I buy a widescreen television costing £1290

I pay £900 now, then
I pay the rest of the money in 3 equal payments.

Show your working.

How much is each payment?

£

. . . . 2 marks

10. Steve needs to put 1 litre of water in a bucket.

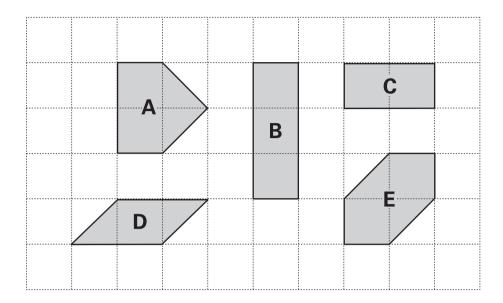

He has a **500 ml** jug.

Explain how he can measure 1 litre of water.

11. The diagram shows some shapes on a 10 by 6 square grid.

(a) Which two shapes have the same area as shape A?

1 mark

(b) Which two shapes have the same perimeter as shape A?

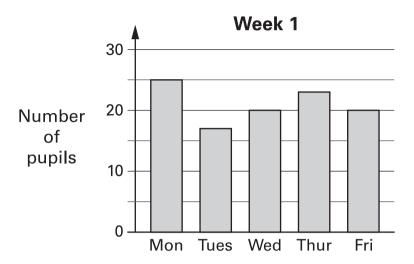

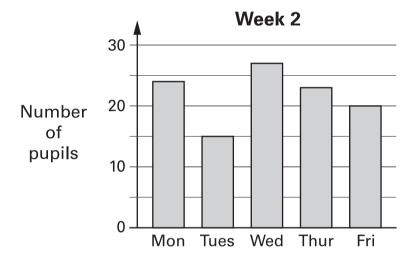

1 mark

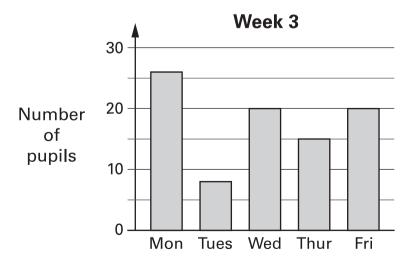

(c) How many of shape C would you need to cover a 10 by 6 square grid?

12. The bar charts show how many pupils went to a maths club.

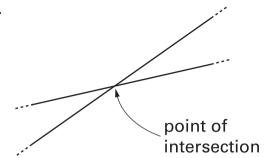

KS3/04/Ma/Tier 3-5/P1

	Is each statement below true or false, or is there not enough information to tell?	
	Tick (✓) the correct box.	
(a)	In each of these weeks, the day with the most pupils was Monday.	
	True False Not enough information	
	Explain your answer.	
		 1 mark
(b)	In each of these weeks, the same number of pupils went to the club on Friday .	
	True False Not enough information	
	Explain your answer.	
		 1 mark
(c)	In each of these weeks, the same pupils went to the club on Friday.	
	True False Not enough information	
	Explain your answer.	
		 1 mark

17

13. The diagram shows two straight lines.

Where the lines **cross** is called a **point of intersection**.

(a) Draw three straight lines that have only one point of intersection.

. . . . 1 mark

(b) Now draw three straight lines that have three points of intersection.

a

1 mark

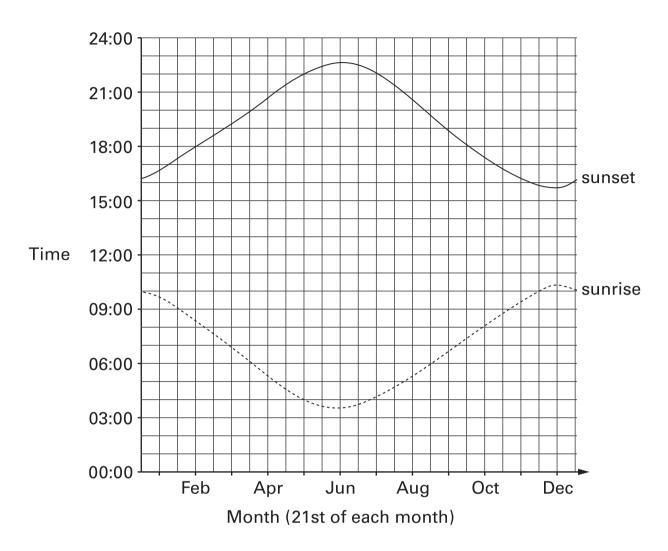

(c) Three straight lines have exactly two points of intersection.

Complete the sentence below.

Two of the lines must be

. . . . 1 mark **14**. The graph shows at what **time** the sun rises and sets in the American town of Anchorage.

The day with the ${f most}$ hours of daylight is called the longest day.

Fill in the gaps below, using the information from the graph.

The longest day is in the month of

On this day, there are about hours of daylight.

The **shortest day** is in the month of

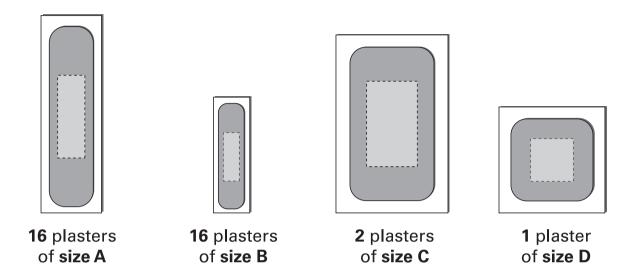

On this day, there are about hours of daylight.

. . . 1 mark

. . . . 1 mark

15. I buy a box of different size plasters.

Assume each plaster is equally likely to be the top plaster inside the box.

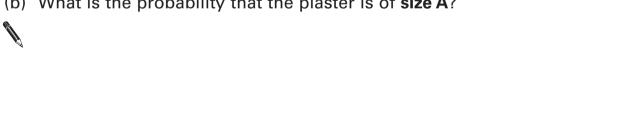

Altogether there are 35 plasters.

I take the top plaster from inside the box.

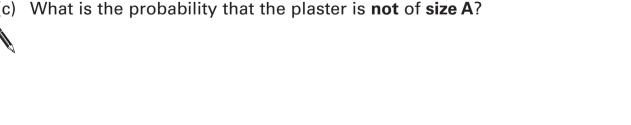

(a) What is the probability that the plaster is of size D?

(b) What is the probability that the plaster is of size A?

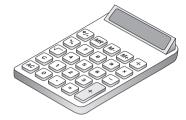

(c) What is the probability that the plaster is **not** of **size A**?

16. You can buy a new calculator for £1.25

In 1979 the same type of calculator cost **22 times** as much as it costs now.

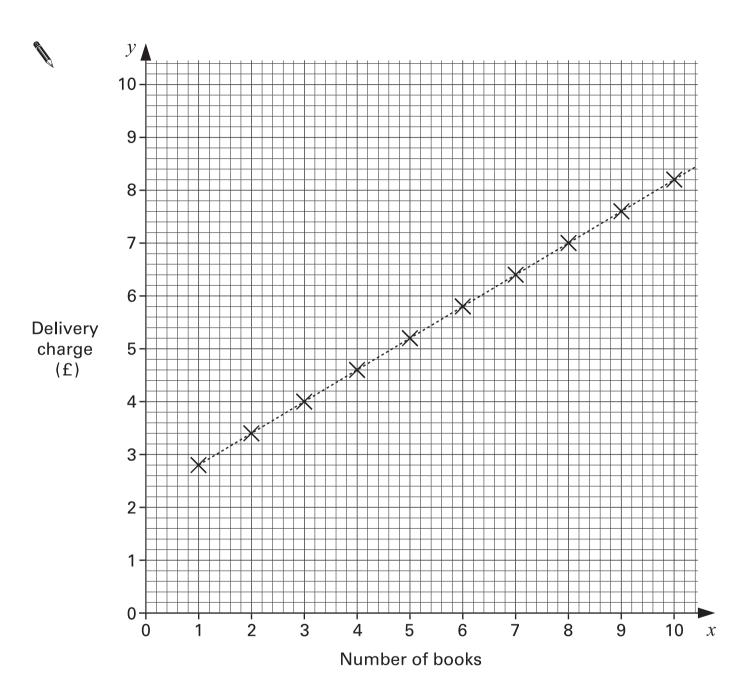

How much did the same type of calculator cost in 1979? Show your working.

£

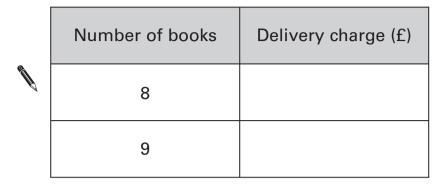

17. A company sells books using the internet.

The graph shows their delivery charges.

(a) Use the graph to fill in the values in this table.

. . . . 1 mark

(b) For every extra book you buy, how much more must you pay for delivery?

. . . . 1 mark

(c) A second company sells books using the internet.Its delivery charge is £1.00 per book.

On the graph opposite, draw a line to show this information.

1 mark

(d) Complete the sentence.

Delivery is cheaper with the first company

if you buy at least books.

. . . . 1 mark **18.** One way to make a magic square is to substitute numbers into this algebra grid.

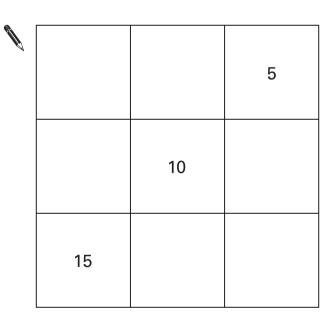

a + b	a-b+c	a – c
a-b-c	а	a+b+c
a + c	a + b - c	a – b

(a) Complete the magic square below using the values

$$a = 10$$

$$b = 3$$

$$c = 5$$

. . .

2 marks

(b) Here is the algebra grid again.

a + b	a – b + c	a – c
a - b - c	а	a+b+c
a + c	a + b - c	a – b

I use different values for a, b and c to complete the magic square.

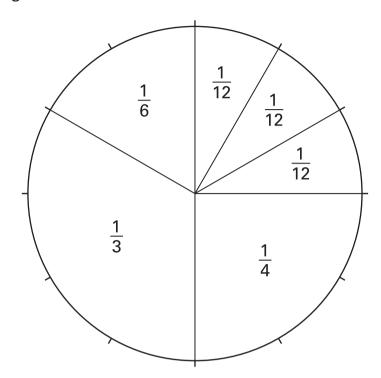

20	21	7
3	16	29
25	11	12

What values for a, b and c did I use?

$$a =$$

. . . . 2 marks

19. Look at this diagram.

The diagram can help you work out some fraction calculations.

Calculate

$$\frac{1}{12} + \frac{1}{4} =$$

$$\frac{1}{3} + \frac{1}{4} =$$

$$\frac{1}{3} - \frac{1}{6} =$$
