

**AFDELING A**

**Vraag 1 - Datavoorstelling**

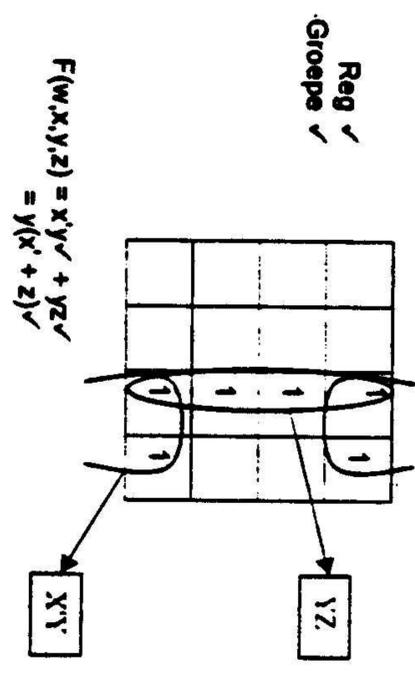

1.1  $[(x'y)(xz)]''$   
 $= (x'y)' + xz$   
 $= (x + y' + z)$   
 $= x + y'$

OR  
 $(x'y)(xz)'$   
 $= x'y(x' + z')$   
 $= x'y + x'yz'$   
 $\rightarrow [x'y + x'yz']'$   
 $= (x'y)'(x'yz)''$   
 $= (x + y')(x + y' + z)$   
 $= x + y'$

1.2  $x + y' = (x'y)'$

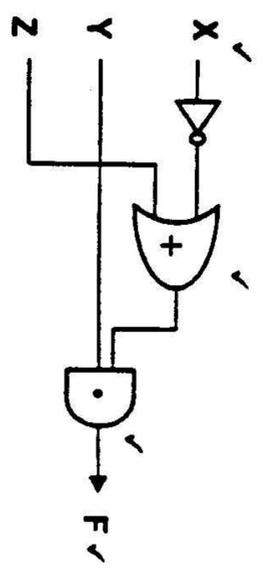

(1)

1.5.1  $F(w,x,y,z) = S(2,3,7,10,11,15)$

(6)

1.5.2

1.3.1 HO - Lewer som en oordrag van 2 bisse. ✓

(4)

1.3.2 VO - Lewer som en oordrag van 3 bisse. ✓

(2)

1.4 15 VO + 1 HO ✓

(2)

[19]

**SECTION A**

**Question 1  
Data representation**

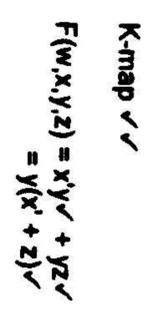

1.1  $[(x'y)(xz)]''$   
 $= (x'y)' + xz$   
 $= (x + y' + z)$   
 $= x + y'$

OR  
 $(x'y)(xz)'$   
 $= x'y(x' + z')$   
 $= x'y + x'yz'$   
 $\rightarrow [x'y + x'yz']'$   
 $= (x'y)'(x'yz)''$   
 $= (x + y')(x + y' + z)$   
 $= x + y'$

1.2  $x + y' = (x'y)'$

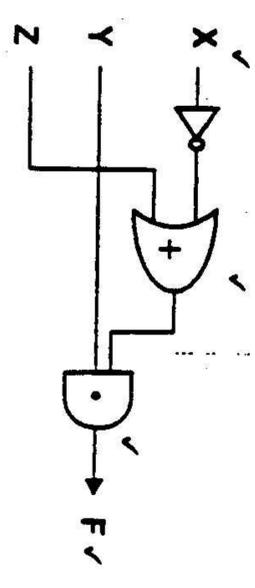

(1)

1.5.1  $F(w,x,y,z) = S(2,3,7,10,11,15)$

(6)

1.5.2

1.3.1 HA - Gives sum and carry of 2 bits. ✓

(4)

1.3.2 FA - Gives sum and carry of 3 bits. ✓

(2)

1.4 15 FA + 1 HA ✓

(2)

[19]

X

Vraag 2  
Argitektuur

- 2.1 Stelselklok
  - 2.1.1 reguleer alle aktiwiteite op die moederbord ✓ *Hyderberg* (1)
  - 2.1.2 om tempo vir SVE aan te gee ✓ (1)
- 2.2 SVE
  - 2.2.1 RISC : eenvoudige masjieninstruksies ✓ wat vinnig uitgevoer kan word. ✓  
CISC : Kombineer verskeie ✓ eenvoudige masjieninstruksies in een,  
meer komplekse, instruksie. ✓ (4)
  - 2.2.2 Verskeie instruksies by verskillende stadia van verwerking.  
1 instruksie word per klokpuuls voltooi ✓ ✓ (2)  
kasgeheue op verwerker self.
  - 2.2.3 wanneer dit uit 2 pyplyne bestaan. ✓ (1)
- 2.3 Kasgeheue
  - 2.3.1 tempo van verwerker vinniger as primêre geheue ✓ daarom is  
kasgeheue gebruik om die mees onlangse data te stoor vir vinnige  
herwinning. ✓ (2)
- 2.4 Stelselbus
  - 2.4.1 data ✓ ; beheer ✓ ; adres ✓ (3)
  - 2.4.2 Databus ✓ - meer instruksies en data ✓ kan op een slag ✓ vervoer word. (3)
- 2.5 Uitbreidingsgleuwe
  - 2.5.1 tempo te stadig ; wydte te nou ✓ (1)
  - 2.5.2 PCI : VESA : AGP ✓ ✓ (2)
  - 2.5.3 kleur : wydte : kepe ✓ (1)
- 2.6 Poorte
  - 2.6.1 (a) COM - muis : modem : kommunikasiekabel (Laplink) ✓ (1)  
(b) LPT1 - drukker : scanner : kommunikasiekabel (Laplink) ✓ (1)  
(c) PS/2 - muis : sleutelbord ✓ (1)
  - 2.6.2 - seriepoort ✓ - tot 127 toestelle aan 1 poort ✓ (4)  
- waarlik PnP ✓ - Hot swappable ✓
- 2.7 SIMM / DIMM-gleuwe
  - 2.7.1 om primêre geheue in te prop ✓ (1)
  - 2.7.2 maklik om geheue uit te brei ✓ (1)

X

Question 2  
Architecture

- 2.1 System clock
  - 2.1.1 regulates all activities on the motherboard ✓ (1)
  - 2.1.2 to give the tempo to be used by the CPU ✓ (1)
- 2.2 CPU
  - 2.2.1 RISC : Simple machine instructions ✓ that can be executed quickly. ✓  
CISC : Combines various ✓ simple instructions into one, more complex  
*1) CISC CPU executed complex instr. > RISC. (1)*
  - 2.2.2 Various instructions are at different stages of completion.  
1 instruction per clock pulse completed ✓ ✓ (2)  
cache memory on CPU itself.
  - 2.2.3 when it consists of 2 pipelines. ✓ (1)
- 2.3 Cache memory
  - 2.3.1 tempo of the processor is faster than access to the primary memory ✓  
hence cache memory was used to store the data that were most recently  
used to be recalled quickly. ✓ (2)
- 2.4 System bus
  - 2.4.1 data ✓ ; control ✓ ; address ✓ (3)
  - 2.4.2 Data bus ✓ - more instructions and data ✓ can be transferred at one  
time ✓ (3)
- 2.5 Expansion slots
  - 2.5.1 tempo too slow ; width too small ✓ (1)
  - 2.5.2 PCI : VESA : AGP ✓ ✓ (2)
  - 2.5.3 colour : width : gaps ✓ (1)
- 2.6 Ports
  - 2.6.1 (a) COM - mouse : modem : communication cable (Laplink) ✓ (1)  
(b) LPT1 - printer : scanner : communication cable (Laplink) ✓ (1)  
(c) PS/2 - mouse : keyboard ✓ (1)
  - 2.6.2 - serial port ✓ - up to 127 devices to 1 port ✓ (4)  
- truly PnP ✓ - Hot swappable ✓ *(1-127)*
- 2.7 SIMM / DIMM slots
  - 2.7.1 to plug in the primary memory ✓ (1)
  - 2.7.2 for easy expansion of memory ✓ (1)

X

Vraag 3  
Stelselprogrammatuur

- 3.1.1 'n Versameling programme ✓ wat alle program- en apparatuuraktiwiteite monitor en beheer. ✓ (3)
  - 3.1.2 kort omkeertyd ✓ *bestuur geloue en foestelle* maksimum deurvoer ✓ hulpbronne effektief te benut ✓ (3)
  - 3.1.3 Windows 9X, Me, NT, 2000 : Linux : OS/2 ✓ ✓ ✓ (3)
  - 3.1.4 gebruik hardeskyfspasie ✓ as ekstensie ✓ van primêre geheue ✓ (3)
  - 3.1.5 buffers ✓ en spoolers ✓ (2)
  - 3.1.6 PDA ✓ (Personal Digital Assistants) (1)
  - 3.2 Aaneenskakeling : 'n Lêer word oor meer as 1 kluster ✓ gestoor en die verskillende klusters word logies saamtekaar geskakel ✓ (2)  
Fragmentasie : Wanneer klusters van 1 lêer ✓ nie fisies na mekaar op 'n skyf lê nie ✓ is die lêer gefragmenteerd. (2)
  - 3.3.1 Geld onttrek (program beheer 'n aktiwiteit wat huidig plaasvind) ✓ (1)
  - 3.3.2 Bedienergesteunde netwerk ✓ (1)
  - 3.3.3 Meer as 1 aktiewe program oop in bv Windows 9X ✓ (1)
  - 3.4 I : om 'n bronprogram stelling-vir-stelling ✓ te vertaal en uit te voer ✓  
K: om 'n bronprogram in sy geheel ✓ te vertaal ✓ na 'n objekprogram (masjientaal) ✓ (5)
  - 3.5 gratis ✓ : bronkode is beskikbaar vir publiek ✓ (2)
- [29]

X

Question 3  
System Software

- 3.1.1 A set of programs ✓ to monitor and control ✓ all software and hardware activities. ✓ (3)
  - 3.1.2 fast turnaround time ✓ maximum throughput ✓ effective use of resources ✓ (3)
  - 3.1.3 Windows 9X, Me, NT, 2000 : Linux : OS/2 ✓ ✓ ✓ (3)
  - 3.1.4 uses space on hard disk ✓ as an extension ✓ of primary memory ✓ (3)
  - 3.1.5 buffers ✓ and spoolers ✓ (2)
  - 3.1.6 PDA ✓ (Personal Digital Assistants) *Designed for use on wireless communications devices, e.g. handheld computers, PDAs* (1)  
Chaining : A file is stored over more than one cluster ✓ and the different *in-vehicle devices* clusters are logically chained together. ✓ (2)  
Fragmentation : When the clusters of one file ✓ do not physically follow one another on the disk. ✓ (2)
  - 3.3.1 Withdrawal of money (program controls a current activity) ✓ (1)
  - 3.3.2 Server assisted network ✓ (1)
  - 3.3.3 More than 1 active program open in for example Windows 9X ✓ (1)
  - 3.4 I : to compile and execute ✓ the source code one statement at a time ✓  
C : to compile and execute ✓ the source program as a whole ✓ to an object program (machine language) ✓ (5)
  - 3.5 available for free ✓ : source code is available to the public ✓ (2)
- [29]

**Vraag 4**  
**Datakommunikasie**

- 4.1.1 Hubs ✓  
 Netwerkkarte ✓  
 UTP-kabels ✓  
 Netwerkprogrammatuur ✓ (4)
- 4.1.2 Bedienergesteun : Novell ; Unix ; Windows NT / 2000 ✓  
 Eweknie : Windows 9X / Me / 2000 ✓ (1)
- 4.1.3 Brug / Roeteerder ✓ (1)
- 4.1.4a Reëls vir datakommunikasie ✓ (1)
- 4.1.4b TCP/IP of IPX ✓ (1)
- 4.1.5a Om te verseker dat elke stasie in 'n netwerk 'n gelyke kans het op versending ✓ (1)
- 4.1.5b CSMA/CD ✓ (1)
- 4.1.5c ROM op netwerkkarte ✓ (1)
- 4.1.6 Mikrorekenaar aan hoofraam ✓ (1)
- 4.2.1 Analooftlyn ✓ (1)
- 4.2.2 Intern ✓ en ekstern ✓ (2)
- 4.2.3 Ja ✓, 'n netwerk ✓ en internet connection sharing saggeware ✓ is nodig (3)
- 4.2.4 Satellietstelsels ✓ en WAP-fone ✓ (2)
- 4.3.1 Serie : een bit op 'n slag ✓ word versend (2)  
 Paralleel : 'n Aantal bisse (bv. 8) op 'n slag ✓ word versend
- 4.3.2 Baud : Tempo waarteen modem moduleer ✓ (2)  
 bps : Die aantal bisse per sekonde ✓
- 4.3.3 HD : Tweerigtingkommunikasie ✓ maar in een rigting op 'n slag ✓ (4)  
 VD : Tweerigtingkommunikasie ✓ gelyktydig in twee rigtings ✓
- 4.4.1 Lym : Toegewyde pad lydens kommunikasie ✓ (2)  
 Geskik vir lrydse dataversending ✓
- 4.4.2 Boodskap : Geen toegewyde pad ✓ (2)  
 Boodskap in geheel gestuur na bestemming ✓
- 4.5 Terwyl die data na die skyf geskryf word ✓ word dik oor verskillende skywe ✓ (4)  
 gestoor saam met partitek ✓ sodat verlore data weer herwin kan word. ✓

[37]

**Question 4**  
**Data Communication**

- 4.1.1 Hubs ✓  
 Network cards ✓  
 UTP cables ✓  
 Network software ✓ (4)
- 4.1.2 Server assisted : Novell ; Unix ; Windows NT / 2000 ✓  
 Peer-to-peer : Windows 9X / Me / 2000 ✓ (1)
- 4.1.3 Bridge / Router ✓ (1)
- 4.1.4a Laws for data communication ✓ (1)
- 4.1.4b TCP/IP or IPX ✓ (1)
- 4.1.5a To ensure that every work station has an equal chance of sending a message. ✓ (1)
- 4.1.5b CSMA/CD ✓ (1)
- 4.1.5c ROM on network card ✓ (1)
- 4.1.6 Micro computer to main frame ✓ (1)
- 4.2.1 Analogue line ✓ (1)
- 4.2.2 Internal ✓ and external ✓ (2)
- 4.2.3 Yes ✓, A network ✓ and internet connection sharing software ✓ are needed ✓ (3)
- 4.2.4 Satellite dishes ✓ and WAP phones ✓ (2)
- 4.3.1 Serial : one bit at a time is being sent ✓ (2)  
 Paralleel : A number of bits (i.e. 8 bits) are being sent at a time ✓
- 4.3.2 Baud : Tempo at which modem modulates ✓ (2)  
 bps : The number of bits per second ✓
- 4.3.3 HD : Two way communication ✓ but not simultaneously ✓ (4)  
 FD : Two way communication ✓ simultaneously in both ways ✓
- 4.4.1 Circuit : Dedicated path during communication ✓ (2)  
 Suitable for real time data ✓
- 4.4.2 Message : No dedicated path ✓ (2)  
 Message sent as a whole to destination ✓
- 4.5 While data is being written to the disk ✓ it is stored over several disks ✓ (4)  
 together with parity so that lost data can easily be reconstructed. ✓

[37]

**Vraag 5**  
**Sosiale Implikasies**

- 5.1 Dit kombineer selfoortegnologie(draagbaar)✓ met PDA'draagbare rekenars✓ (2)
- 5.2.1 Ontwerp en stel netwerke op✓ en sorg dat die netwerk doeltreffend gebruik kan word✓ (2)
- 5.2.2 Sorg dat die apparatuur en programmatuur✓ van 'n webbediener✓ reg werk. (2)
- 5.3 Sleigs as bewys kan word dat die bank finansiële skade✓ gelei het a.g.v. die "inbraak". (1)
- 5.4.1 Elektroniese aankope✓ oor die internet✓ (2)
- 5.4.2 Enkripsie-tegnologie✓ (1)
- 5.4.3 24 uur per dag✓ gemak van huis✓ nuutste pryse✓ geen kontakant hanteer✓ (4)
- 5.5 Kommunikasie (E-mail)✓ insaamel van inligting✓ (2)
- 5.6 Bv. Siggestreand : Groter skriftype of kleurkontras ✓✓ (2)

**[18]**

**AFDELING A : [133]**

**Question 5**  
**Socio-economic Implications**

- 5.1 It combines cell phone technology(portable)✓ with PDA's/portable computers.✓ (2)
- 5.2.1 Designs and sets up networks✓ and make sure the network can be used effectively.✓ (2)
- 5.2.2 Ensures that the hardware and software✓ of a web server functions correctly.✓ (2)
- 5.3 Only if it can be proven that the banks financial loss✓ as a result of the break in. (1)
- 5.4.1 Electronic purchases via the internet.✓ (2)
- 5.4.2 Encryption technology✓ (1)
- 5.4.3 24 hours a day✓ comfort of own home✓ latest prices✓ no cash being handled✓ (4)
- 5.5 Communication (E-mail)✓ Gathering of information✓ (2)
- 5.6 E.g. Sight disabled : Use of larger fonts or colour contrasts ✓✓ (2)
