

## Instructions

This verbal reasoning test comprises 30 questions, and you will have 25 minutes in which to correctly answer as many as you can.

You will be presented with a passage to read, and a statement about that passage. You must select one of the following answers:

True: The statement follows logically from the information or opinions contained in the passage.

False: The statement is logically false from the information or opinions contained in the passage.

Cannot Say: It is not possible to determine whether the statement is true or false without further information.

You will have to work quickly and accurately to perform well in this test. If you don't know the answer to a question, leave it and come back to it if you have time.

Try to find a time and place where you will not be interrupted during the test. When you are ready, begin the test.

Work-related stress is one of the biggest causes of sick leave in the UK. If you've noticed you always seem to be rushing about, or miss meal breaks, take work home or don't have enough time for relaxation, for your family or for exercise, then you may well find yourself under stress, especially at work. There is often no single cause of work-related stress, but it can be caused by poor working conditions, long hours, relationship problems with colleagues, or lack of job security. Stress is often the result of a combination of these factors that builds up over time. Work-related stress can result in both physical problems, such as headaches, muscular tension, back or neck pain, tiredness, digestive problems and sweating; or emotional problems, such as a lower sex drive, feelings of inadequacy, irritability and lack of concentration. According to recent surveys, one in six of all working individuals in the UK said their job is very stressful, and thirty percent of men said that the demands of their job interferes with their private lives.

Q1	Stress at work is often caused by relationship problems with your partner.		
	True	False	Cannot say
Q2	Work-related stress	can result in tir	redness and a lack of concentration.
	True	False	Cannot say
Q3	One in six working r	nen said their j	ob is very stressful.
	True	False	Cannot say
Q4	If you spend more ti	me with your fa	amily, you will not suffer from stress.
	True	False	Cannot say

For many years the hunt has been on to find an effective way to treat cancerous tumours using physical rather than chemical means. That hunt may now be over with the latest breakthrough made by Dr Jennifer West at Rice University in Houston, Texas. West has done tests on animals using a non-chemical procedure known as Photothermal Ablation. She injected millions of nanoparticles, which can absorb infrared light, into the animals' bloodstreams. These particles go straight to the tumours because, unlike healthy tissue, tumours have abnormal blood capillaries that will let them through. A few hours later an optical fibre is inserted into the tumour and a blast of infrared light is passed down the fibre, which heats the particles and effectively cooks the tumour.

		•	
True	False	Cannot say	
Nanoparticles are ob billionths of a metre.	jects whose d	imensions are measured in nanometres, or	

Photothermal Ablation is the latest breakthrough in chemical treatment for cancer.

Cannot say

Q7 Nanoparticles can absorb infrared light.

True

Q5

True False Cannot say

False

3

U3b Networks (short for the "Underprivileged three billion" who lack internet access) is a new company in Jersey set up by Greg Wyler, former owner of Rwanda's national telephone company. He intends to provide cheap, high-speed internet access to remote areas in developing countries, which up to now has been the reserve of developed countries. Mr Wyler plans to charge \$500 per megabit per month, compared with the \$4,000 charged by existing companies. Mr Wyler has so far raised €40m from investors, but this seems like a risky investment, especially as billions were lost on similar projects a decade ago. So why are they investing in the hope of finding customers in the world's poorest regions? The reason is that previous projects were over-ambitious and set out to provide global coverage, whereas U3b's project is far less ambitious and its services will only be available to a ribbon around the equator, covering most developing countries. It will initially use just five satellites circling 8,000km above the equator.

Q8 Mr Wyler had a background in			n telecoms before starting U3b Networks		
	True	False	Cannot say		
Q9	The satellites for th	e project will cos	st €8m each.		
	True	False	Cannot say		

True False Cannot say

Most developing countries lie close to the equator.

Q10

We have all heard about bullying in schools, but bullying in the workplace is a huge problem in the UK which results in nearly 19 million days of lost output per year and costs the country 6 billion pounds annually. Workplace bullying is the abuse of a position of power by one individual over another. Otherwise known as harassment, intimidation, aggression, coercive management and by other euphemisms, bullying in the workplace can take many forms involving gender, race or age. In a nutshell, workplace bullying means behaviour that is humiliating or offensive towards some individual. This kind of bullying ranges from violence to less obvious actions like deliberately ignoring a fellow worker.

Q11	Bullying in the workplace costs the UK an average of 6 billion pounds each year.		
	True	False	Cannot say
Q12	Another name for wo	orkplace bullyir	ng is coercive management.
	True	False	Cannot say
Q13	Bullying in the workp	lace is someti	mes the result of religious intolerance.
	True	False	Cannot say
Q14	Deliberately ignoring	a fellow work	er is a kind of bullying.
	True	False	Cannot say

Nobody knows what life forms may exist outside our own planet. The search for extra-terrestrial life in the universe took a step nearer to fruition with the discovery in June of what are believed to be traces of water on the surface of Mars. Life on our planet requires water and its presence on Mars may point towards the existence of past life on the planet. The Phoenix Mars Lander landed on the plains of Mars on May 25<sup>th</sup> 2008, searching for signs that the Martian environment might once have been habitable to life. When it dug a ditch in the planet's surface, photos revealed small patches of bright material. Four days later those patches had disappeared, causing scientists to speculate that they were water ice that had previously been buried and which vaporised when exposed to the air. Scientists insisted that if the patches had been salt, they wouldn't have disappeared and if they had been solid carbon dioxide, then they wouldn't have vaporised.

Q15	The Phoenix Mars Lander has provided proof that life once existed on Mars.			Mars.
	True	False	Cannot say	
Q16	All life in the univers	e requires wate	er in order to survive.	
	True	False	Cannot say	
Q17	The patches could have been a different substance from water.			
	True	False	Cannot say	

Most workers in the UK over the age of 16 are legally entitled to a minimum rate of pay, called the minimum wage. An independent body called the Low Pay Commission (LPC) each year reviews the rate and recommends to the government what it should be. With few exceptions, the minimum wage is the same for all types of work and all kinds of business. The current amount for people over 22 years of age is £5.73 an hour. The rates for younger workers are less. However, the following groups are not entitled to receive the minimum wage: workers under school leaving age, the genuinely self-employed, some apprentices, au pairs, armed service personnel and voluntary workers. Also agricultural workers have separate rates of pay set by the Agricultural Wages Board.

Q18	The Low Pay Commission sets the rate of the minimum wage each year.		
	True	False	Cannot say
Q19	The Agricultural Wa	ges Board sets	the rates for agricultural workers.
	True	False	Cannot say
Q20	The minimum wage	for all workers	of 16 years old is 5.73 pounds an hour.
	True	False	Cannot say
Q21	All au pairs receive	ess than the m	ninimum wage.
	True	False	Cannot say

The 2008 A Level results show that 97.2% of students passed compared with 96.6% in 2007. 25.9% gained A grades, a rise of 0.6%. The number of students sitting A Levels, 827 737, was also a record. This high success rate is causing concerns in some quarters that the exams are getting easier. However, the government insists that the results reflect increased spending and improvements in teaching. Meanwhile the general secretary of the Association of Teachers and Lecturers, Dr Mary Bousted, has berated teaching methods in schools as spoon-feeding students to pass exams without developing the desire to continue learning and the skills necessary to learn independently. In reply the general secretary of the University and College Union, Sally Hunt, suggested it is unfair to downplay the students' results and the hard work of their teachers.

Q22	The improvement students sitting the		is a reflection of an increase in the number	iber of
	True	False	Cannot say	

**Q23** A level exams are getting easier.

True False Cannot say

The general secretary of the University and College Union has said that students are being spoon-fed to pass examinations.

True False Cannot say

International Development Secretary, Douglas Alexander, has compared sanitary conditions in developing countries today with the situation in London 150 years ago when Parliament had to be closed owing to sewage running through the streets of the capital and a stench from the River Thames - an event that has been called 'The Great Stink'. Today more than 1 billion people in developing countries have no toilets and 900 million have no access to clean water. Mr. Alexander's response has been an announcement that the Department of International Development plans to build more than 50 million toilets and provide clean drinking water to more than 25 million people in developing countries over the next five years. This plan is part of the department's broader strategy to help poor countries in Africa and Asia to better manage their water resources and fight the effects of climate change.

Q25	'The Great Stink' occurred in London.			
	True	False	Cannot say	
Q26	When the project to build toilets is completed, on average twenty people are going to have to share one toilet.			ıg to
	True	False	Cannot say	
Q27	The Department of Inclean drinking water		evelopment intends to do more than just provid Africa and Asia.	de
	True	False	Cannot say.	

On 1<sup>st</sup> July 2007 the smoke-free law was introduced in England with the aim of protecting employees in their places of work, and the general public in enclosed public places, from the effects of secondhand smoking. These law changes mean that all public transport and work vehicles used by more than one person must now be smoke-free, no-smoking signs must be displayed in all smoke-free premises and vehicles, and staff smoking rooms are no longer allowed; staff who want to smoke must go outside. Local councils in England have the responsibility of enforcing the law but it is the legal responsibility of the managers of smoke-free premises and vehicles to make sure people don't smoke. Individuals can be fined or prosecuted for breaking the law and employers can be fined if they do not display the no-smoking signs or if they allow smoking to continue on their premises.

Q28	Secondhand smoking can cause lung cancer, bronchitis and other respiratory diseases.		
	True	False	Cannot say
Q29	Truck drivers working alone are not allowed to smoke under the new law.		
	True	False	Cannot say
Q30	It is no longer legal for internal smoking rooms to be provided for employees.		
	True	False	Cannot say
