10	Date Slices	40	£0·75	£30·00
11	Flapjacks	80	£0·50	£40·00
12	Custard Creams	40	£0·60	£24·00
13				
14			Total Cost	£169·00
15			Discount	£16·90
16			Final Cost	£152·10

- (a) The *cell protection* feature of the spreadsheet package is used frequently.
 (i) State what is meant by “cell protection”.

1

- (ii) Name **one** cell in the above spreadsheet it would be sensible to protect.

1

- (b) The *formula* to calculate the cost of Fairy Cakes is in cell D7.
 State the **range** of cells this formula has been replicated into.

1

1. (continued)

- (c) State the type of referencing used when the formula in D7 was replicated.

State **one** reason for your answer.

Type of referencing _____

Reason _____

2

- (d) The discount is calculated as follows.

If the Total Cost of the order is greater than £100 then a discount of 10% is given. If not, they do not get a discount.

State the formula that was entered in cell D15.

= IF (_____ , _____ , _____)

3

- (e) State the formula that was entered in cell D16 to calculate the Final Cost.

4. (continued)

(c) Monique plans to use her laptop for doing research on the *Internet*.

- (i) State the **type** of site on the Internet designed to help you find information.

- (ii) She uses it to look for any drama clubs in Dundee.

State the type of *search* she will use.

- (iii) Write down exactly what you think Monique will enter to find a list of drama clubs in Dundee.

(d) Monique gets a list of names and addresses of seven drama clubs in Dundee. She sends a letter to each asking for part time work.

She plans to write one basic letter with placeholders for personal details.

- (i) State the name for this type of letter.

- (ii) State the name for the operation which will insert the personal details into the placeholders in her letter.

5. An automated system has been installed in a bottle manufacturing plant. Each *robot* on the production line is linked to a computer.

- (a) (i) Name the type of language used when writing programs for automated systems.

1

- (ii) Explain why this type of language is used.

1

- (b) The software for the robots on the production line can be held either on a disk or in ROM.

State **one** advantage of disk based software.

1

- (c) Some of the robots on the production lines can be considered as **intelligent**.

Describe **two** features a robot must have to be considered intelligent.

1 _____

2 _____

2

- (d) The bottle manufacturing plant uses *mobile robots* to transfer heavy materials around the factory.

Humans work in the same area as the robots. State **two** possible *safety precautions* which should be in place.

1 _____

2 _____

2

6. (a) The *processor* is made up of three components.

Fill in the blanks in the table below.

Component	Description
<i>Control Unit</i>	
	Carries out calculations and makes simple comparisons
<i>Registers</i>	

3

- (b) Describe how the processor distinguishes between memory locations.

2

- (c) State how text is **represented** in computer systems.

1

All computers require an *operating system*.

- (d) State **two** functions of an operating system.

1

2

2

7. Seonag has created a website to advertise her holiday cottage on a Scottish island.

- (a) (i) Seonag used web page creation software to produce her website.

State the language that Seonag used to create her website.

1

- (ii) State the type of software needed to view her website.

1

- (b) Most web page creation packages make use of *wizards* and *templates*.

- (i) Explain why using a wizard is helpful to a beginner.

2

- (ii) State what is meant by the term “template”.

2

Her website allows users to connect with other websites.

- (c) State what Seonag has done to allow this to happen.

1

7. (continued)

- (d) Seonag also added a *table* showing pictures and details of local tourist attractions.

- (i) State **one** advantage of using a table for this purpose.

1

The table included *hotspots*.

- (ii) State how anyone browsing the website will know where the hotspots are on the page.
