-
- Figure 1 illustrates the development of a 1D lattice over time. The lattice is represented by a grid of cells, numbered 0 to 14. The top row shows the initial state, where a single particle (represented by a black dot) is located at cell 0. The middle row shows the state after one time step, where the particle has moved to cell 1, and new particles have appeared at cells 2, 3, 4, and 5. The bottom row shows the state after two time steps, where the particle has moved to cell 2, and new particles have appeared at cells 3, 4, 5, 6, 7, 8, 9, and 10. The particles are represented by black dots, and the cells are represented by horizontal bars.

- A black and white line drawing of two men rolling a large, treaded tire. The man on the left is pushing the tire from behind, while the man on the right is pulling it from the front. They are both wearing shorts and t-shirts. The tire is large and has a prominent tread pattern. The background is simple, with some light shading on the ground.
